## LETTER OF THE MONTH!

### IN THIS CORNER, DATA EAST...

March 17, 1994—Judge William H. Orrick of the Federal District Court in the Northern District of California denied Capcom U.S.A., Inc.'s motion for a preliminary injunction enjoining Data East's marketing and distribution of Data East's video game "Fighter's History" and any newer versions of that game. Capcom claimed that Fighter's History infringed Capcom's audio visual copyright for its Street Fighter II family of video fight games. Capcom also claimed that Data East had copied the "total concept and feel" of Street Fighter II in addition to copying certain fight characters and special moves.

Judge Orrick held that "Data East has not captured in Fighter's History the 'total concept and feel' of the protectable expression in Street Fighter II. Rather, the similarities that result between the two games stem from Data East's emulation of the unprotectable, commonplace features of Street Fighter II, such as its stereotypical fight characters and its reliance on unoriginal fighting techniques derived from the martial arts." The court further held that "Capcom cannot now withdraw from the public domain ideas and standardized expression ... To do so would be commensurate to awarding Capcom a monopoly over a range of characters and moves it did not create. It would also allow Capcom to lay proprietary claim to all reality based fight games featuring human characters. Copyright law affords no such protection."

"We have always believed that Capcom's allegations of infringement had no legal or factual merit, and the Court's ruling has vindicated our position," said Mr. Tetsuo Fukuda, President of Data East. "Data East believes Capcom was attempting to obtain a monopoly over all one-on-one fight games. The Court's ruling ensures that healthy competition may continue in this industry," Mr. Fukuda said.

### ...AND IN THIS CORNER, CAPCOM

March 23, 1994—After filing suit last September against Data East Corporation and Data East USA, Inc. for infringement of its Street Fighter II copyright, Capcom was denied a preliminary injunction last week that would have prevented the sale of Data East's game, Fighter's History while the case proceeded. However, with a trial date set for Oct. 31, 1994, the recent decision by Judge William H. Orrick of the Federal District Court for the Northern district of California is not the Court's final decision on infringement of Capcom's copyright. While declining to enter a preliminary injunction, the Court has indicated that if Capcom prevails at trial, it could recover damages for Data East's continuing sales.

"Judge Orrick's decision is not completely surprising considering that no formal discovery has been conducted and that the information and evidence available to the Court was limited as a result," states Ian Rose, Capcom's general counsel. "The denial of our injunction request in no way assures Data East's final victory and we remain convinced that Data East has unlawfully infringed our copyright. Once all the facts are known, we're confident that the Court and jury will agree."

In his decision, Judge Orrick found that Data East did not "refute the strong evidence that Data East set out to copy Street Fighter II's success and that Data East's developers spent hours studying Capcom's game to see how this game might be accomplished." Judge Orrick also found that certain characters and character moves in Fighter's History were similar to characters and moves found in Street Fighter II that are protected by copyright. The Court was "disturbed" by certain "coincidences" in special move control sequences and, for example, found Data East's selection of a female Chinese character like Street Fighter II's Chun Li, "troublesome."

Furthermore, refuting Data East's suggestions that Capcom might be trying to "obtain a monopoly" over one-on-one fight games, Rose stated, "Capcom has no desire to exclude healthy competition in the video game industry. Instead, we hope that the outcome of this litigation will create an added incentive for the development of truly original and creative games rather than formulaic emulations of existing product. To the extent that the Court takes a narrow view of the applicability of copyright law to protect creative expression in video games, we believe the industry as a whole could be weakened and that the creative and original work of software publishers would be inadequately rewarded." Capcom also continues to aggressively pursue parallel litigation against Data East in Japan.

*(Ed. To cut through all the legal jargon, this whole lawsuit boils down to the issue of copying. Capcom felt it was necessary to bring up a lawsuit, since they felt the characters and special moves in Fighter's History were a direct copy of the well-known Street Fighter II family. Take a look at the two-page Special Feature on Fighter's History and judge for yourself. Now that both sides have spoken and although the Court hasn't ruled a decisive victor, it looks as if the consumer, will be a different kind of judge. When both games hit the store shelves, which game are you going to rush out and buy, Fighter's History or Super Street Fighter II? Is this a case of the little guys beating the giants? Only sales will tell. The bottom line is that while they're under litigation, Data East will be bringing out Fighter's History and the choice will be yours.)*

**THINK AGAIN!**

I read in your February EGM that Sega was debuting the new Genesis CD-X. I think the system is going to be great. I mean, after all, you will get to play from hundreds of games and CDs. Question: What's wrong with the system? Answer: No Screen! I think Sega has just committed a very serious crime. A portable system with no screen is a big mistake! Here's some advice for Sega: Think again! Sure it's great that you can use all the games on it. Another thing that bugs me is the price. I mean, 400 bucks is nuts. Sega, don't think you're going to see the unit as fast as Sonic. Think again.

**Raul Mendiola**  
San Antonio, TX

Will the Sega CD-X revolutionize the way we play games? Only time will tell.

*(Ed. We're in complete agreement with you on this one, Raul. We were disappointed when Sega never developed a portable Genesis system and hearing rumors of a portable Sega CD seemed cool. However, the absence of a screen seems rather futile. Granted, the addition of a nice LCD screen will have added weight, size, and most notably cost, many consumers would be happy to fork out some extra cash to get a portable Genesis and Sega CD. As it seems now, the CD-X looks like it will end up being a high-tech toy for those who don't own a Genesis or a Sega CD. While it is nice that it can be used as a portable CD player, who would want to lug around a \$400 compact disc system, especially when you can buy a portable CD player for less than 100 bucks nowadays. The biggest question on a lot of minds out there must be if Sega will introduce a way to hook the CD-X to the Game Gear so you can picture. It sounds like a great idea and it will be interesting to see what turns up.)*

**LETTER OF THE MONTH!**

If you think you have what it takes to contribute to society, go write to *Newsweek*. If, however, you have a thought or opinion that fellow gamers would particularly find crazy, we'd love to immortalize you with a special edition EGM T-shirt proclaiming your fondness of and psychosis to video games!

I love *Mortal Kombat*. *Mortal Kombat* is my life! I love to go to the arcade and play all day long. My favorite character is Sonya because she's a girl. Once, when I was playing *Mortal Kombat*, I said "Hi" to this girl. She hit me. But I got the last laugh because I popped a few zits on her fist. I used to do drugs but I don't have time for them anymore because I play *Mortal Kombat* now. I figured out all the fatalities myself! When the arcade closes and I go home, my mother says I should "fatality" myself because I'm failing in high school. Ha! She doesn't even know that I quit high school so that I could play *Mortal Kombat* more! I weigh 55 pounds and my *Mortal Kombat* buddies say I should eat more but I don't have enough money because I spend it all on *Mortal Kombat*. I figured out this new fatality with Scorpion where he rips out your eyeballs and eats them, shoves his hand up your nose, and pulls out your brain. I have decided that when I'm older, I want to be a policeman so I can do that to people. Anyway, I love your magazine. I can't say I've ever read it but the *Mortal Kombat* pictures are cool. Bye!

Congratulations go out to Mooncricket Chernicky of Bonsall, CA, for his love of *Mortal Kombat* and his career in law enforcement. Your T-shirt is on its way. Just try not to sell the shirt to get arcade tokens, OK?

**WHAT EVER HAPPENED TO...?**

Whatever happened to *Mortal Kombat* for the Sega CD? I've seen it in your magazine twice and I've seen it in the black and white ads in the back of the magazine. It was supposed to be released in December, but I haven't seen it in a review or on store shelves. My friend says Acclaim folded under the pressure of all the controversy and will not release it. Is this true? I am also considering the purchase of a NeoGeo and when I see it in the black and white ads in your mag I see a 'Gold System' for about \$500.00 and a 'Silver System' for about \$350.00. Could you please tell me the difference between the two, other than 150 bucks?!

**Kevin Ferguson**  
Warren, MI

*(Ed. Kevin, *Mortal Kombat* for the Sega CD is alive and well and you'll find it as a Fact File in this very issue. Acclaim hasn't folded under the pressure of the media, since this one still contains all the blood and gore like the Genesis version. This game has all the same characters and stages, plus a lengthy video sequence from the popular TV commercial. The*

*Mortal Kombat* for the Sega CD is here! Turn to the Fact File for more information!

*gore and fatalities no longer need to be accessed with a code since it has an MA-17 rating. The NeoGeo Gold System is the most popular version. The whole setup comes with the NeoGeo system, two controllers, and one game. The NeoGeo Silver system contains the NeoGeo and one controller, no game. For those who dislike the pack-in games or don't have the money for the Gold System, would do well to get the Silver System; otherwise, the Gold System really is the best value for the buck.)*

## MULTIPLE LANGUAGES

I'm a faithful reader, although I have never written to you before. I want to refer this particular question to your review of NHL Stanley Cup (EGM #55, p.36). You wrote: "Why is there a selection for French dialogue?" Where I live, there are over 6 million French-speaking people. That means we make up for 2 percent of the North American population. It's very hard to survive in this English world and to preserve our culture. Maybe one day we'll all be assimilated to your English system, but for now, we try to resist. Try answering this question. In the history of video games, how many had the option for French dialogue in them? I think NHL Stanley Cup is the second game that does. Two out of hundreds and hundreds.

Do you find that too many? Young children who don't know English yet are having fun for the first time with this game. I'm sure they're waiting for the first bilingual RPG. Many children between the ages of eight and 12 are not playing wonderful games like Zelda because they can't read the text. So stop thinking about yourselves guys, you're not alone in America.

Sylvain Leroux  
Montreal, Quebec, CAN

NHL Stanley Cup offers a choice between the languages of English or French.

(Ed. The purpose of our statement wasn't to bash the idea of having multiple languages in video games. In fact, we think it is a terrific idea that many companies just haven't capitalized upon. The reviewer was merely surprised at the fact you could change languages, something that isn't too common in video games. A few games that we could think of did offer multiple languages, including Gaiars from Renovation and McDonald's Treasure Land from Sega. Both for the Genesis, they allow you to change from English to Japanese. Where in the World is Carmen Sandiego? and Where in Time is Carmen Sandiego? from Hi-Tech Expressions for the Super NES and Genesis offer five language choices: English, French, Dutch, Italian, and Spanish. An interesting side note is that American Softworks was planning on introducing Chavez Boxing for the Super NES with all the text and speech in Spanish! And let's not forget about the Neo-Geo. As many people already know, nearly all of the Neo-Geo games are bilingual. Although you can't change languages through a typical options screen, if you take an American Neo cartridge and plug it into a Japanese Neo-Geo, the language will change to Japanese, and vice versa. As you can see Sylvain, there are companies out there who understand our dilemma. When we point out something like a language change in a review or a Fact File, there's no need to take it personally, it's just something that happens to catch our attention.)

**HANDICAPPED GAMERS**

I have been in a wheelchair since the age of eight and I became an ardent video gamer at the age of 12. Because I could not play in any sport or engage in any activity requiring physical exercise, I turned to video games for entertainment. I have since become the local video game champ and advisor, and am the proud owner of several game systems, along with over 100 games. While I enjoy playing games at home, I long to play the latest arcade games and this is where my problem arises. Muscular Dystrophy, my handicapping condition, makes my arms difficult to use. Even though I can control all of my home games, arcade controls are often too high and/or poorly arranged for people like me to use. I am sick and tired of being embarrassed in public and wasting other players' time because I can't reach or move the controls. I usually start out OK but then my arms get tired. I hold my own on the home gaming front but I think I have the right to be able to play games in the arcade. Isn't there some way to make a 'handicapped accessible' arcade machine? If not, why doesn't somebody design one? I'd really appreciate any feedback or information you people could give me. Thanks for your time.

**Jim Lafayette**  
Norwich, CT

*(Ed. To my knowledge, I have never seen an arcade machine that is easily accessible for handicapped persons such as yourself. I'm sure that creating such a machine wouldn't be too much of an effort for arcade manufacturers. Do you remember when Nintendo addressed the problem a long time ago? They produced a controller that you would wear on your body and use your mouth and chin along with sucking and blowing actions to move the joystick and activate the buttons. While an idea like this may not be suitable for arcades, it may just be best for designers to lower the joysticks and buttons to a height that would benefit wheelchair users. How about it? If there are any arcade manufacturers addressing this problem, or if anyone has developed a good solution that has been marketed for arcade use, drop us a line. Everyone should be able to enjoy the arcade and the thrill of these games should not only apply to non-disabled people, but handicapped people as well.)*

### ED SEMRAD

When I first heard about this game, I was filled with dread. I didn't think Takara would be able to pull this translation off. I was wrong. Fatal Fury 2 has all the moves and sounds of the Neo version, plus there's a way to play as the Bosses! This is one of the best fighting games around for the Super NES and shouldn't be missed. Only the music suffers a bit. It's a small price to pay for such an awesome game.

### AL MANUEL

Takara has really gone all out on this one. They have made one of the best arcade-to-Super NES translations, with very little missing from the original. All the awesome moves and great graphics are here as well. The big bonus is the ability to play as the Bosses with the use of a secret code. The only bad side to the game is the slight drop in music and sound quality. This game is just too cool to pass up.

### DANYON CARPENTER

Fatal Fury 2 came off better than expected. This terrific translation offers all the fighters, all the moves, and all the fun of the original arcade version. The control is absolutely flawless and the timing for all the special moves is precise. My only gripe would have to be the music, but it's not bad enough to warrant the volume being turned down. Overall, this is a great game and worthy of the original it came from.

### SUSHI-X

One of the better fighting games ported to the Super NES, Fatal Fury 2 is sure to keep all fighting fans busy, including yours truly. The graphics and playability are a great reproduction of the Neo-Geo version. The sounds could be a bit better but the game doesn't suffer from it. To top it off, the Boss Code allows you to choose the other four characters, giving you even more guys to master. Fighting fans must check it out!

There, forces are holding the magical Gatekeeper, who is desperately needed for the health and prosperity of the kingdom. Without him, plagues and general chaos reign.

To find the vortex, you must face many dangers and evil enemies. If you question carefully and seek advice, you'll find the leader of the Brotherhood and learn vital secrets of the Orb. If you use careful planning and strategy, you'll make it through the hazards, and find the trapped, magical prisoner. But, even if you make it that far, you must still attack the Heart of the Maelstrom, where the nexus of the forces holding the Gatekeeper reside.

If things go according to plan, weeks of heart-stopping adventure await you in Wizardry V.

*With the swing of a sword, the magician's final life points are slashed away.*

<b>The Flintstones</b>	
Action	Release: Now
Levels: 70	8 Meg

If you want a good action game, Flintstones delivers. The graphics and tunes reflect the cartoons brilliantly. There's lots of stuff to find and loads of technique. The cinematics are also well done. Here's the bad news ... this cart slows down way too much! Even when only a couple enemies are on the screen it happens. Other than that, the Mode 7 races are cool, and the control is perfect. It just needs to be sped up a bit.

The Flintstones is kind of cool. Although it seems a bit strange having to roll an on-screen die to move around the map, the concept is different. The graphics are nice and cartoony while the music is very catchy. However, there are some complaints. The game really slows down at odd points in the levels and the game is very easy to beat. Other than that, The Flintstones is a decent Super NES title.

Flintstones is one of the more entertaining games to come out for the Super NES. It's a treat for the eyes with super graphics that capture the look and feel of the Hanna Barbera classic. Even the sound is an excellent match to the famous theme song. The game plays as good as any game should with a lot of little techniques to learn. It's too bad that the game slows down too much. It would've gotten a higher score.

Flintstones has a fresh type of interface that resembles a board game. Each spot you land on is different, which develops some strategy as you play. The action scenes are fun to play and are filled with very colorful graphics. Sounds are also up to par as is the control of your character. There are plenty of techniques to master to keep you playing and the great renditions of the classic characters keep you interested.

Super NES	Viacom
<b>Rocko's Modern Life</b>	
Puzzle	Release: Now
Levels: N/A	12 Meg

Rocko certainly isn't a kids game. This game is a challenge for even the best of players. Sometimes too much so. The visuals and voice are directly from the show, and capture its spirit. The cinematics are among the best around. Sometimes it's a little hard to get Spunky where you want him to go. If you're looking for a game that you won't beat in one sitting, Rocko's Modern Life will come through for you.

Those who've seen the hilarious cartoon will know what to expect from this game. It's filled with all the wonderful humor and fun a game like this can offer. The puzzles are tricky and get downright brutal in later levels. The digitized voice and catchy tunes are a real treat to listen to as well. If puzzle games are your not-ticket, then Rocko's Modern Life will certainly not disappoint you. I'll be playing this one for a while!

I'm not a regular viewer of the show, but that's not why I don't like this game. I'm just not into action games where you must complete tasks to clear a stage. I found the game tedious. Granted the graphics were very good with characters directly from the TV show. The sounds were exceptional with voice digitized as well. The challenge and difficulty is good, but they just weren't enough to get me to like it.

I can understand the appeal of the characters but I never got into them like Ren and Stimpy. The game has some very challenging puzzles, but they often become frustrating before you can get control over your little buddy. I enjoy puzzle games but this one was a bit taxing, rather than being enjoyable. The graphics and sounds are good but unless you really enjoy the characters, you might just want to give up.

Genesis	Koei
<b>Liberty or Death</b>	
Strategy	Release: Now
Levels: N/A	16 Meg

This type of game normally appeals to me, but Liberty or Death seems to play quite slow. I don't get the feeling of being in control and the events don't seem all that connected. The graphics are very good and I really liked being able to play as the British. The strategy part of the game is very well done and if this is your type of cart, you better plan to set a lot of time aside for it because once you start you won't stop!

Koei has never been one to let me down when I wanted a good strategy game and Liberty or Death is another heavy hitter. While the story doesn't really excite me, this one will definitely keep you glued to the TV set for hours on end. You get total control over the troops, money allocation, and territory control. This is a great time warp back to the early days of American history. It's worth a look.

I dread the time when I have to review these types of games, because they are just not the kind I get into. Like most of the games that are like this, I found Liberty or Death to be a slow-paced war simulation. The graphics could have been better as well as the music and sound. On the plus side, this game comes out on the positive as an aid to a student's history lesson, but overall, it's just not my type.

War simulations are made for a very particular type of person and, unfortunately, I'm not that type. Granted there is a lot to do and plenty of strategy, but the category as a whole doesn't catch my eye. This one in particular tries to give you a forced history lesson. I can see it appealing to fans of the genre, however the graphics aren't anything special and the particular options don't seem to interest me.

## MAJOR MIKE'S GAME ROUNDUP

### S.O.S

#### Vic Tokai / Super NES

A unique adventure game using the plot right out of The Poseidon Adventure. Get out of a passenger ship that has turned upside-down. Here you must use precise abilities other than kicking, jumping, and punching.

#### NBA Showdown Electronic Arts / Genesis

NBA Showdown has all the ingredients of a promising title, however, the action is very choppy, robbing this one of the fluidity and game play. Still, everybody's favorite team is here and sports fans will probably enjoy it.

**ED** **DAND** **AL** **SUSHI MIKE**

#### Double Dribble Konami / Genesis

Double Dribble is an interesting entry into the basketball genre, but the game play lacks control and the game needs more fine tuning. The Password Option is good, but overall, the game just ends up average.

### Genesis Tengen

#### Grind Stormer

Shooter	Release: Now
Levels: 6	8 Meg

This reminds me of the Golden Age of the Genesis shooters. This game would easily be the cream of the crop a few years back, and by today's standards, rates right up there. Unlike a lot of shooters, this one gives you a constant challenge from beginning to end. The graphics are top-notch, with power-ups that are really helpful. The sound of your shots is extremely annoying, but it's a minor flaw.

Shooters are pretty rare these days so it's nice to be able to review one. Grind Stormer doesn't offer anything new in terms of weapons or enemies, but the game does offer a challenge with its fast-paced game play and hard difficulty. The music and sound effects get old really quick and the game flickers a lot when the screen is filled with enemies. At best, Grind Stormer is above average.

It's too bad that this game didn't come out a few years back. This is the type of shooter that would have won shooter of the year, but the problem is that there are too many weapons that we all have seen already, like a wide weapon attack and a homing weapon. Yes, they are cool and powerful weapons to have, but are not anywhere near original. Aside from this, it's a good shooter that can stand on its own merit.

Here is a good shooter that has all the standard types on weapons and power-ups, but doesn't really have any new gimmicks to catch your eye. This is not to say that the game isn't good. As a shooter, the graphics are very good and it plays as well as any other. Any shooter fan would be glad to add this to their collection. I hope shooters start to make a comeback among all these fighting carts.

### Genesis U.S. Gold

#### The Incredible Hulk

Action	Release: July
Levels: 5	16 Meg

The Incredible Hulk is very cool to look at, but the play control needs to be better. You almost get hit by everything the enemies throw at you. Trying to pick up items quickly can get aggravating. The sounds are nice and the graphics of the Hulk himself look like they're from the comic series. If you are a hard-core gamer, you might like this one but the difficult control will probably give even experienced gamers a problem.

What we have here is a game with great graphics, animation and sound plagued by difficult control, plus way too many cheap hits. Since the Hulkster has no defensive moves like blocking, you end up reaching your way toward enemies just to hit them. All the different attacks Hulk can perform on enemies are great. The problem is that they're so hard to execute, you end up getting frustrated in the long run.

If you're expecting a game loaded with decent graphics, good sound effects, and some very cool moves from the Hulk, you've come to the right place. But if you are looking for a game with good game play, you might as well move on because this title is definitely lacking in this department. You get hit so easily during each stage. The enemies shoot almost a steady stream of bullets that you can't avoid. Unfair.

I'm surprised they didn't do more with the Hulk. There seemed to be a lot of moves on later levels, but at first, the game is frustrating and only has a simple punch and throw. The game could use a few more types of enemies and more types of weapons or power-ups to interact with. The Incredible Hulk has a lot of possibilities, but they weren't fully exploited. The graphics were decent but it needs more game play to help out.

### Sega CD Sega

#### Tomcat Alley

Simulation	Release: Now
Levels: N/A	CD-ROM

Tomcat Alley isn't what you'd quite expect. You really don't fly your plane. Instead you operate things like the firing mechanisms and chaif dispensers. The access time is carefully masked, so even the most careful eye will probably miss it. The graphics are really well done, and for once, you see the whole screen. If you don't mind the play mechanics, you'll probably enjoy Tomcat Alley. It's different but good.

AAargh, another full-motion video game! If you've played Night Trap or Double Switch, then you've played Tomcat Alley. Seriously though, this game is pretty cool. The first thing you'll notice is that the video is full-screen, a Sega CD first. However, this makes the video very blocky and often hard to see. There are tons of video clips so it's rare that you'll see the same one over and over. Overall, this game is more of the same.

Tomcat Alley is nothing I would run out to buy at first sight. At a glance, you are treated to a long cinema, a la Top Gun. After that, it's pretty much downhill. You never really get into a self-flying mode since it's not as interactive as one may think. All you do is move a cursor on the screen. The graphics are okay but the sound is poor for a CD game. About the only thing I like is that it uses the entire TV screen.

Instead of a flight sim, this is more of a live-action game. There are tons of scenes with decent digitized action, but you mainly control a point-and-shoot type of game rather than fly around. The game hides its access time really well by showing a scene to keep your mind off of it... nice trick! Also there are multiple scenes for explosions to prevent it from getting tired. A good attempt, but not my style.

# It all began when

I pushed the start button on my new ASCIIPad SG-6. There was this gigantic flash, and suddenly, I was floating in space. Just then, hundreds of vicious alligators solar-surfed past me, heading towards Earth. If you've never seen an alligator with an attitude, trust me, they're scary. Lots of teeth, and they're not vegetarians.

"We're sick of our swamp planet," they snarled. "We're taking Nebraska!" I live in California, so I'm thinking, "So what?"—but then I remembered my buddy Travis, from Omaha\*. Besides, sooner or later, I knew they'd add Los Angeles to the menu. So, the fate of the World was in my hands. Actually, a Fighter Stick was in my hands—so I flicked on the slow motion control to buy some time. Just then, a spy satellite flew past, with —get this—a laser cannon. I plugged the cord in, switched on turbo fire and blasted those lizards at over 30 shots per second.

3DO Origin

### Super Wing Commander

Simulation Release: Now

Levels: 72 CD-ROM

Now this is what I want! Super Wing Commander is a top-notch flight simulator that anyone and everyone should pick up. One look at those cinema displays and you'll swear you're watching a movie. Once you get into the cockpit, the fun still doesn't stop. The control is superb and the Kilrathi opponents really know their stuff. If you love flight sims, this game will not let you down in any way, shape, or form.

Oh yes! This is how the 3DO should be. This classic game is even better than the PC version. The graphics are incredibly smooth and the cinema displays will knock you off your feet! Flight simulations are a true rarity and this game would be an excellent addition to anyone's 3DO wish list. The missions are truly challenging with a lot of variety and great computer opponents. A fantastic game!

Very cool, man! This is one good 3DO game. Super Wing Commander is loaded with some of the best visual graphics I have ever seen, especially in the cinemas which are a sight to see. The musical score belongs in the Top 10. The story is very cool too, keeping you gripped to the game. The only downside to it is the slight difficulty in dogfighting in space. Other than that, this is one fantastic piece of work!

After playing the original Wing Commander on the computer, I never thought a home version would come close. I have to admit that this game is just as good, if not better! The cinemas and graphics are utterly incredible. Real digitized voices and sound effects accompany the good scrolling and dogfight action. I've never really liked flight sims, but the look and playability of this game is great.

Duo TTI

### Might & Magic III

RPG Release: Now

Levels: N/A CD-ROM

This fantasy game just doesn't excite me. When out of the town, you get attacked every two steps by entire armies of orcs and goblins. Needless to say, most parties won't last a few feet outside. The music fits very well and the graphics are also good. I just didn't get the feeling of being there since the plot line isn't too hot either. There are much better RPGs on the market than this one. I'm passing it up.

Role-playing games have always been my favorite type, but Might & Magic III is nothing to get excited over. Sure, it has a long and twisting plot but the aggravatingly slow play and the constant barrage of enemies with nearly every step you take. The music would really help the score if the game didn't have so many faults. If the only system you own is a Duo and you must have an RPG, then check it out, but beware.

Hey! This isn't an anime RPG! Might and Magic III isn't really the type of RPG I can get into. I couldn't get into it simply because I found the pace of the game moved too slow, making me lose interest. I also didn't like the perspective where you would move one entire space at a time. It was too choppy and I got lost easily. Other than these, the graphics were OK and the music was very good.

Recently I've been getting into RPGs more and more, but I've never had an affection for first-person perspective RPGs. Admittedly, the graphics and sounds are top quality but the perspective gets real repetitive for me. I prefer a game where you can see your entire character, such as Mana. However, this is a faithful reproduction of the computer version and fans of this series will like it just as much.

Game Boy Hot-B

### Black Bass: Lure Fishing

Simulation Release: Now

Levels: N/A 1 Meg

I never thought that I'd like a fishing game, much less one on the Game Boy. The lures don't really seem all that different from one another, but reeling the fish in is a real treat. The scrolling when you reel the fish in has good scaling (no pun intended.). The sounds are simply average. Surprisingly this game plays well, and your line only snaps once in a while. This is the type of game that grows on you.

I'm no top fisherman but what we have here is a cool game that is just getting old. The original versions from a few years back were fabulous for their time. Although it's on the Game Boy, there's no blurring but color really does have its place in fishing. The lure selection is good and the other options really help out. I guess this would be a good game to bring along on a fishing trip. At least you'll catch something!

Personally, I think that fishing is a big bore. Unfortunately, I feel the same way about Black Bass for the Game Boy. Except for the title screen, I found nothing in the game that was appealing. Because of the Game Boy's graphic limitations, all the lures you use look alike. And you are better off playing with the sound off. Maybe if I was into the sport, I would like this game, but unfortunately, I'm not.

Oh boy ... let's face it, good old Sushi has never been a big Game Boy fan or fishing fanatic for that matter. So where does this game fall in my book? Well, there isn't any exciting action or technique sport of all the fishing lures and reeling. The graphics are typical Game Boy and the sounds are of the same nature. I tried to give it a chance, but this is simply not my type of game or system!

### The Horde

### Chase HQ 2

### Aladdin

Action Release: Now

Levels: 7 4 Meg

Aladdin has great graphics for a Game Gear, and the music is among the best around. The chase scenes play particularly well, but the barrels are sometimes hard to see. The regular action sequences are a bit rough, however. Jumping isn't as fluid as it should be and it's hard to avoid the enemies. This is one of those must-have carts if you own this system. Simply a good game that's fun. Rare indeed.

Not bad, Sega. It's no Genesis conversion but it's still a blast nonetheless. At first play, I thought the game only consisted of the chase-type scenes, but I was happy to see that there were action scenes as well. The animation is very good although the levels seem to be a bit short. The tunes are OK, but hey, they're 8-Bit. If you buy one Game Gear game all year, Aladdin is definitely a good choice.

As a big fan of the movie, Aladdin hits right on the mark as one of the best portable games to come out for the Game Gear. As you play through the game, you will find that Aladdin is loaded with some exceptional graphics and cool backgrounds. The sound isn't half bad either. I like the controls and the way the game plays, although it was a little on the easy side. This is a fine choice for Game Gear owners.

This is unlike the 16-Bit versions, but it has an appeal all its own. Each level is a bit short yet they are interesting and still seem to follow the movie. There are some good cinematics and background graphics. Also, the music is pretty good for a portable. The controls and game play are simple and may not provide too much of a challenge but if you plan on taking a trip this is a good one to spend your time on.

Game Gear Sega

### Poker Face Paul: Blackjack

Simulation Release: Now

Levels: N/A 1 Meg

It's a bit hard to get into Poker Face Paul. It just doesn't have that "human" feeling to it. As a result, I don't find it all that exciting. The graphics are OK I suppose, and fit the subject matter well. Poker Face Paul is easy to play, and it's easy on the eyes. I just didn't find this title all that much fun to play, but then again, I'm not usually interested in these types of games. Only if it's your type...

Poker Face Paul makes a great traveling companion. Although I really suck at gambling as a whole, this game really helped to teach me the basics of Blackjack and really improved my game. What's with this MA-13 rating, though? Could this game really be that bad for kids? Oh well, gambling video games have never really come up to speed but this game has a few redeeming qualities to make it stand out.

I guess they'll make anything for a video game. Now they've got one for Blackjack. Poker Face Paul is a decent game for a card game. There are plenty of cool options to make it pretty interesting on those long road trips. The option to play in any of four casinos is useless because they all look the same. I can't say much for the graphics and sound, because I am not a big fan of portables. Just use a real deck.

It seems pretty simple to me to just make a Blackjack game. If this were coupled with a few other casino-type games, it might have a bit more staying power. As a B.J. game it's good but there is only so much you can play unless you get addicted to the game. The graphics are good and it plays well with all the options you would expect. Hey, I could have used this on the plane ride to Vegas for the Winter CES.

Lynx Atari

### Ninja Gaiden III

Action Release: Now

Levels: 8 2 Meg

Ninja Gaiden plays a lot like the NES classics. The game plays especially well for the small screen. The blurring inherent to the system is pretty bad, particularly because your character is so small. The magic is really easy to use, and it helps out tremendously. Ninja Gaiden is a good title to pick up if you have a Lynx. If you can bear the blurring, you will be in for a real treat. Games like this don't come out often.

How's this for a surprise? Ninja Gaiden III is a decent translation from the popular series. Play control is very good with precise movements. The graphics are simply brilliant on the Lynx's great screen. There are lots of hidden surprises to find and the magic really helps out in tight situations. But, alas, the characters are microscopic, making the game almost a chore to play. A rare gem but a bit tarnished.

Ninja Gaiden is a game that the Atari Lynx has been longing for. Like its Nintendo counterpart, Ninja Gaiden has great game play that exceeds many of the other action games in this genre. The sound, although 8-Bit, is OK and gets the player hyped. The problem I run into is the small characters. They are so small that you can't tell where you are sometimes. Anyone with a Lynx should pick this one up.

This game has some of the qualities as the NES version which had some fun action scenes. Game play is pretty decent for a portable but the character is a bit hard to keep track of due to its small size and somewhat blurry look. However, the sounds are decent and the control is pretty good. From one title to another it's an average game. If you're a fan of the series, then this portable cart is for you.

...Hey kids, it's time to get wacky with the Quartermann, your one-stop shop for the very latest in gossip and insider dirt! Yours truly has put in extra hours this month, my Q-Fans, to deliver some of the best scoops from inside and out the gaming industry! So plug in for the best rumors in the galaxy ... First this month, the Q tips his hat once again to the white shirts at Sega, who have once again bested the Nintendites in a peripheral for console upgrades. Actually, Nintendo's move is more of a system *downgrade*, letting their B&W titles from the G-Boy play on the big screen. The Sega add-on, meanwhile, delivers a 32-Bit super-charger that could best be described as a Saturn Jr. Although the Q hears it won't come with all the chips and other goodies that its big brother will boast, the 32X is sure to attract more biz with the lower price tag. You have to wonder, however, how does the 32X fit into things and will the Saturn have a cart port to play the 32X games?...

...In other news from the high-tech front, the Quartermann hears that Virgin has uncovered a nifty way to make their 3DO titles play in both the normal video as well as the MPEG-1 formats. This little discovery will come as a bonus surprise to those 3DO nuts who invest in the add-on cartridge. The Q-Mann predicts that Virgin's discovery will be accepted industry-wide, solving the current problems some chains are having in trying to decide whether or not to carry two versions of the same game ... Have you ever noticed that one of Shannon Doherty's eyes is higher than the other? ... From the courts, roving reporter Dug Lowell tells the Q that Capcom has struck out in the fight for a preliminary injunction against Data East's Fighter's History game ... While we're talking Capcom, which of course means Street Fighter 2, the company plans to have a new SF coin-op on the streets to coincide with the release of the big-budget movie that just snared Jean-Claude Van Damme in its tractor beam to play Guile (Van Damme plays the American?). Could this new game, which will supposedly get some heavy promos at the beginning of the movie, be the long-awaited Street Fighter 3? The Q-Mann isn't telling...

...Comics are becoming big biz in the gaming world! Although T\*HQ bailed on their exclusive to do Ultraverse games (bad move Hans, didn't you hear that there's an Ultraverse TV show in development???), Malibu Interactive had no trouble getting a real gaming power-house, Sony, to pick up the license. Look for the first titles, including Prime and FireArm late in the year ... Also at Sony, one of the premiere comics of the '90s is set to debut in the third quarter. Todd McFarlane's Spawn game is under way and could hit with an original comic attached ... Also from the Image Comics camp, Jim Valentino's Shadowhawk character will hit in time for Christmas with an original comic attached ... Add in the Marvel and DC titles (look for a new Batman game from Sunsoft), and comic book superheroes have become the hottest theme since Pac-Man clones ... Hey, Nintendo! When are you going to do a 16-Bit update to Donkey Kong? The Q was only half-right that you were doing a DK update, but what yours truly really wants to see is an original title with the DK style and some super graphics. Mark my words: It would be a SMASH...

From the Far East, Terry Aki tells me that the 3DO is mustering up some interest, with a new magazine devoted entirely to Trip's hardware ... Also new from the Land of the Rising Sun is word that the Sony PS-X could be a MAJOR leap forward in game system development. Yours truly has spoken with a number of developers who are hardly able to contain themselves. Also, Sony is doing their launch the right way by tying up a variety of high-powered licensees, but from what the Q has heard it's still a tightly knit club—in other words it's not a 3DO and only the best are being given access to the hardware ... On the other side of the U.S., meanwhile, the Q-Mann hears that games are hitting the skids, with a number of developers and publishers consolidating their skills to get leaner and meaner ... Also on the other side of the pond, the Quartermann hears that the gaming mags are folding for cover now that *EGM UK* has the green light to go...

...Looks like Acclaim has scored the rights to what may be one of the hottest licenses of the summer, the Kurt Russell sci-fi extravaganza called *Stargate*. The big 'A' is also rumored to be working on a game based on the Monster Wars-monster truck concept and, of course, MK2. Speaking of the Acclaim-Midway relationship, the Q hears that stocks moved for both companies on rumors that Midway was about to pull their exclusive license to the home game producer which expires in March of '95. Although things got edgy, the Q hears that both sides are still knee-deep in negotiations ... That rounds out this action-packed issue of the Quartermann report. *EGM* subscribers should check out this month's Q-Letter for the beginning of a very special series of tip sheets for some of the hottest games. This month you get an easy reference guide to MK2 with all the moves and more - ready to clip and take to the arcade! Stay tuned for *Virtua Fighting* moves next ish!...

## THE SUPER GAME BOY IS HERE!

Ever since it came out, Game Boy owners have been wanting a way to play their games in A) color and B) on their TV. Well, now they can.

Nintendo is planning on releasing their Super Game Boy. This is essentially a Super NES cartridge with a Game Boy adapter built in.

How will you have color? Well, normal Game Boy games have four shades of gray. The Super Game Boy will allow you to assign color values to these shades. Future Game Boy games will have the ability to display up to 256 colors when connected to the

Super Game Boy. Your games will also have stereo-symphonic sound as well.

Its release date is scheduled for June 6, and the price is to retail for \$59.99. It's just the thing for you Game Boy lovers. No more blurring!

The Super Game Boy lets you play your games on TV and even in color!

## TURN YOUR GENESIS INTO A SATURN!

On March 14, Sega of America announced that it would provide a way for Genesis owners to upgrade their current 16-Bit system to a real 32-Bit machine. The system is called the Genesis Super 32X. At one-third the cost of the most technologically advanced systems on the market, the Super 32X will be able to give the player a taste of what to expect in the future from the Saturn.

What makes this system so special? Well for starters, it is the first product from Sega to use the Hitachi SH2 RISC chips destined for Saturn. The two SH2 chips will complement a newly designed VDP (video digital processor) chip. This will give your Genesis a faster processing speed, high-color definition, texture-mapping, enhanced scaling and rotation, not to mention improved polygon graphics, a true 3-D perspective, software motion video, and CD quality sound.

The 32X can display 32,000 colors

via special cables and it will come with its own power supply.

Most importantly, the 32X will also bring up the color palette and graphics of the Sega CD!

Right now Sega has more than 30 titles under development, but the actual names and specifics are being kept under wraps. You might be wondering about the licensees. Sega expects them to have a similar number of titles ready for the worldwide introduction of the system this fall. Best of all, this technology is going to put you back only about \$149. It's a small price to pay for so much machine.

It will be the next logical step up to the Saturn, while you can still play all of your old Genesis and Sega CD titles as well. Sega apparently wants to keep the compatibility going.

"Here's another example of how your investment (in your Genesis) is protected," stated Bill White of Sega.

It hasn't been determined yet

whether or not the 32X will be compatible with the upcoming Saturn. With the 32X in the stores, Sega might just now decide not to put a cartridge port on their Saturn system. However, based on Sega's strong history of making their systems backwardly compatible, one would think that they wouldn't walk away from the cartridge industry, but Sega isn't talking yet.

It is also unknown whether or not the Japanese carts will be able to work on the 32X.

The games will be priced around the same as the average Genesis cart, and it is not certain yet whether or not a game will be packed in with the 32X, but *Virtua Fighters* is the logical choice. In addition, with Sega's strong presence in the coin-op industry it is probable that most of their other popular arcade titles will be made into 32X games. Perhaps we'll see the *Sonic* arcade game along with some of their other current arcade hits.

Well into the future,  
the world's only hope is  
a weapon from the past.

## NEW AUDIO TECHNOLOGY REDEFINES SOUND AS WE KNOW IT...

A newly formed company called NuReality has developed a product called the VIVID 3-D. This sound enhancement system connects to any mono- or stereo-based game to create dynamic three-dimensional sound. By retrieving ambient sound information hidden in the game's audio track, the VIVID 3-D system adds a new dimension to the sounds and music. This will work for not only PC-based systems, but for cartridge-based games as well, like the Nintendo and the Genesis.

Via a strategic partnership with SRS labs, the VIVID 3-D system incorporates patented SRS technology to create three-dimensional sound from just two speakers. This technology was created as part of 10-year, multi-million dollar research, with development help from the Hughes Aircraft Corporation.

Based on the Hughes Sound Retrieval System, Model AK-100, the NuReality system is a sized-down version made specifically to have optimal effects with the video game systems. This will make it cheaper for the consumer.

It's hard to describe the effect on paper, except that it is true 3-D sound, unlike anything short of a mega-expensive system elsewhere. Since it's supposed to be compatible with existing systems, the games do not need to be encoded with any special source material. The VIVID 3-D system can be used with any audio system to create a true-to-life sound image. It doesn't even matter whether the signal is mono or stereo.

These systems, unlike others, have no "sweet spot," so you can enjoy the 3-D effects no matter where you are in the room.

NuReality can also be used in conjunction with other audio systems, like Dolby Surround Sound or QSound, even

enhancing their effects.

It's user friendly too! On the NuReality VIVID 3-D there are three knobs you can turn. The first knob is called the "center." It can adjust the music to bring out the vocals, sound effects, or increase the music. The second knob is for "space" so you can increase the sound stage, making things more realistic. The third one, "level," adjusts the overall volume.

NuReality is striving to develop the technology as audio enhancement for game applications, among other things.

What's really nice is that the price is going to be roughly \$69. It's release will be sometime in April.

Enough about specs, what we really care about is how it sounds. From the demo we got at their studio, all we can say is wow! There has never been any audio enhancement that even comes close to what we were able to hear with the VIVID 3-D. It is quite safe to say that this system is an improvement over stereo as stereo was over mono!

For more info or to place orders you can call: SRS Labs at 1-800-2HEAR3D. For the \$99 VIVID 3-D you can call 1-800-501-8086. We'll be back with a full update soon!

This is the chip that makes the 3-D sound possible in the NuReality system.

This NuReality system connects to any game system and adds a new dimension to audio!

The full-blown Model AK-100 Sound Retrieval System is available from SRS Labs for about \$299 and provides audio enhancement to all forms of music ranging from old mono records to laser discs!

## JURASSIC PARK by Sega

Welcome back to another month of wonderful Arcade Action—the only column which can ask the burning question, “Is that a roll of tokens in your pants or are you just glad to see me?” Nasty innuendos aside, let’s get down to business.

From the you-knew-it-was-coming-so-shut-yer-yap department, Sega is planning on releasing the Jurassic Park™ arcade game within the next month.

Based on last summer’s blockbuster movie, this two-player shooting game looks more like an amusement park

ride than a video game. The game realistically responds to dinosaur attacks and course movements, giving the player a feeling of actually being in the world’s most notorious theme park!

The object of the game is simple: Use your tranquilizer guns to knock out

How much is that Raptor in the window? Watch out for these, they're really fast!

the dinosaurs, and then reinstall the island’s security system. Along the way, you’ll encounter flying lizards, Raptors, and, of course, the infamous Tyrannosaurus Rex!

Great action and impressive graphics highlight this impressive effort by Sega! This is one of those games that you don’t want to miss! Growl!!!

These enormous flying lizards will do a lot of damage if you don’t shoot quickly!

## SUZUKA 8 HOURS 2 by Namco

Use your body (literally) to throw your bike into some heavy-duty turns!

Namco has enjoyed great success in the past with its motorcycle racing game, *Suzuka 8 Hours*. Now Namco has once again made waves in the arcade arena with the sequel to this outstanding coin-muncher. Get ready to shift gears, and throttle-up with *Suzuka 8 Hours 2*.

Featuring three new racing circuits to challenge racers, *Suzuka 8 Hours 2* will obviously be big on replay value. The first of the new circuits, *Green Hill Circuit*, is a great test of your high-speed driving. The second, *The Bay Side Raceway*, requires a semi-high degree of technical racing expertise. Finally, there's *Devil's Canyon* which requires a high degree of technical knowledge.

Although visibility is decreased, driving at night isn't as tough as you may think.

In addition to the new racing circuits, players will also be treated to improved graphics and sounds. The motorcycle graphics have also been tweaked for increased realism. The controls remain

the same as the original: You sit on a replica racing bike and maneuver by leaning into turns. The brake and throttle controls work,

Your computerized opponents are very good. Don't let them get too far ahead!

Make sure you really give 'er the gas on the straightaways. Watch your position!

The schematic of the courses will give you a good idea of their difficulty.

as does everything else, like a real motorcycle.

The cabinet itself can be linked to other *Suzuka* cabinets. What this means is that four two-player units can be combined to accommodate up to a whopping eight players! Cooooo!!!

Hit the track and burn it up with Namco's *Suzuka 8 Hours 2* at an arcade near you.

Road signs alert you to any unexpected turns which you may encounter.

Learning how to take corners without skidding is the key to securing a victory.

## PARODIUS by Konami

The arcade version of Parodius retains the whimsical nature of past versions.

Konami of Japan has released a new arcade Parodius. For those of you who don't know about Parodius, (Shame on you!) here's a brief rundown of its history.

Intended as a parody of the Gradius series (Parody+Gradius= Parodius), Parodius first surfaced in Japan as kind of a joke. It appeared first on the old 8-Bit Famicom. Later, after picking-up popularity among shooter fans, it

migrated to the Game Boy and then to the PC Engine. Finally, a couple of years ago, Konami released it for the Super Famicom. Parodius is now considered a favorite among shooter fans worldwide because of its whimsical nature,

There are now over a dozen wacky characters for players to choose from!

astoundingly cool graphics and enemies, plus its ability to make us laugh aloud.

The arcade version of Parodius will, in all likelihood, not make it to America. It includes tons of new characters (including girls in scanty outfits who ride

big missiles.), tweaked graphics, and that freaky 50-foot-tall dancing girl who tries to stop your fighter!

It's a shame that you have to see these pictures, because you'll probably never get a chance to play it. Maybe Konami will ... Nah, I doubt it!

Hopefully, the Parodius arcade game will find its way to American shores!

Each character has a wide variety of weapons which can be used at any time.

Whoa! Power-ups galore! Obviously Parodius still retains its Japanese flair.

You guessed it! The Parodius dancing girl makes a cameo appearance.

## INTERNATIONAL NEWS

There's a lot of news from the Land of the Rising Sun, and this measly little space in the mag isn't big enough to hold it all.

First off, it seems as though the Street Fighter 2 anime may be delayed in Japan. Why? I don't know, but I'll be looking out for more info.

More big news is that World Heroes 2 is on its way to the Super Famicom. Mud Man beware!

Did you hear that the Chinese Communist Party's newspaper (*People's Journal*) wants to condemn games as "electronic cocaine?" Sounds just like the U.S.

Also of note, Bandai has signed on with Sega of Japan and is working on a Dragon Ball Z game that combines elements of the two SFC fighting carts. See a picture of it below.

Ah well, on with the show!

### Spark

Mega Drive

Action

April '94

Unknown Price

Looks like Sega has a hot new action hero on the way. Spark is one shocking customer who can convert electrical energy into weapons, such as a powerful Beam sword. He can also charge up and zip around as an invincible thunderbolt. (While he's doing this, Spark basically turns into a metallic pinball with no control over where he's going.) Spark also has a nifty dash move that also provides a short period of invincibility. But watch out for water, because Spark's energy level drops way down if you touch it. Yow!

The looks of this 16 Meg game is very cartoony and filled with a lot of bright, fantastic color combos. The backgrounds look particularly impressive when Spark has to tap into a computer system to physically weed out bugs.

Despite having an uncanny resemblance to Sonic the Hedgehog, Spark is completely separate from the series. With a little luck, it might reach the States. Definitely a good action game for the Mega Drive.

Run through a TV studio dodging enemies while trying to find a way out.

Streak down the city-scape in search of computer bugs to destroy.

# BLAST PROCESSING

## THE MYTH OF SPEED & POWER

Have you ever wondered why balloons came before supersonic jets? It's simple. Hot air is easier to make. When it comes to 16-bit video games, the hot air coming out of Sega's marketing department could inflate a giant Macy's Thanksgiving Day hedgehog—well, almost. Before you make a choice between 16-bit systems, you should get the cold, hard facts.

### A BLAST OF HOT AIR

This "Blast Processing" you've heard about is said to speed up Genesis games, but what is Blast Processing? When we called Sega, they said it was just a marketing buzz-word. And according to programmers we talked to who design games for the Genesis, Blast Processing doesn't exist except in the minds of Sega's marketing department. There's no Blast Processing hardware. There's no Blast Processing technology. There's no super "Blast" boost of any kind. So what about Sonic's speed? The truth is that you could put Sonic or any character on the Super NES and have it race across the screen just as fast. You could also easily scale him so large that you'd see each individual hedgehog hair (not a pretty sight) and you could rotate his background until he really turned

blue. So why don't Genesis games have special effects like that? Because they don't have the custom graphics processors that are used in the Super NES, and because Blast Processing isn't worth a hedgehog's hair when it comes to real gaming advantages.

**The truth is that you could put Sonic on the Super NES and have him race across the screen just as fast!**

Comparing speed on the two systems is like comparing apples to oranges. Processing speed can be measured in several ways including CPU clock speed and memory cycle time. For instance, the Super NES has a slower clock speed but a faster memory cycle

time. Even so, according to game programmers, processing power is not just a matter of CPU speed. In fact, CPU speed is only one of many factors. The only real way to judge speed is by playing the games. It is important in games like F-Zero and Street Fighter II Turbo, because the element of speed adds to the challenge. On the highest speed settings of SF II Turbo (at ten stars), only a real master can react quickly enough to throw a winning combination. On either the Super NES or Genesis you could have characters move so fast that you literally couldn't see them, but what's the fun in that? So what is this myth about Blast Processing? That's simple. Clever ads from Sega's marketing department. If you've been taken in by this myth, don't feel bad. You're not alone.

### TRUE POWER PROCESSING

When the Super NES debuted, critics said that Nintendo had waited too long before entering the 16-bit market. What Nintendo had been doing, however, was creating a new technical standard for video games. The Genesis had been put together with mainly off-the-shelf parts that had been designed for generalized computing functions, not video games. But the Super NES incorporated six customized chips and a CPU with specialized, Direct Memory Access high-speed functions and two advanced PPU's or video processing units. The video processors are uniquely designed to provide graphic effects like the eight independent background mode functions including the rotation and scaling effects of Mode 7. Mode 7 is a built-in function of the Super NES PPU that has revolutionized home video games. Sports games in particular have risen

to a new level with in-your-face perspectives like that of NCAA Basketball and NHL Stanley Cup. This is true Power Processing. It's wired in. And the Super NES does more than manipulate graphics—it also gives you better graphics from the start with more than 32,000 colors to choose from while Genesis has 256. The Super NES can display 256 colors at one time while the Genesis can only show 64. While 128 sprites can appear on the screen on Super NES games, only 80 appear on the Genesis. Put a Super NES game like Street Fighter II, Alien<sup>3</sup>, The Lost Vikings, or Nigel Mansell's World Championship Racing next to its Genesis equivalent and you'll see the difference: the Genesis, presents a flat, pale reflection of the Super NES. It's like comparing fresh oranges to Tang. The Genesis just ain't got the juice.

## SUPERior NES

- ✦ Two video processor PPU units with eight mode effects including Mode 7 for special graphics effects like rotation and scaling
- ✦ 6 custom designed chips for video games as opposed to only 2 custom chips on the Genesis circuit board give more graphics effects, more colors and better sound
- ✦ Almost twice the internal memory for speeding up programs
- ✦ Data retrieval is 280 nanoseconds for the Super NES—88% faster than Genesis
- ✦ Sound Signal to noise ratio is 2.5 times better in the Super NES for sharper more realistic sound effects, voices and music
- ✦ The Super NES Controller has 12 buttons to eight for Genesis for greater game play versatility and better control

## FOR THE SUPER NES ONLY

If speed is all that a game has, then it won't be fun for long. Involving game play is a matter of variety, challenge and depth. It might feel good to rocket through Sonic 2 the first time you plug it in, but what then? The built-in power of the Super NES gives game designers and programmers more meat to sink their

teeth into. These guys are masters—they want to take their game ideas to the limits, and the Super NES is the 16-bit platform that gives them the custom graphics and sound processors to do it. Here are some of the best: *Super Metroid*, *Street Fighter II Turbo*, *The Legend of Zelda: A Link To The Past*, *Super Empire Strikes Back*, *Star Fox*, *Mega Man X*, *Super Mario Kart*, *NCAA Basketball*, *Secret of Mana*, *Final Fantasy II*, *NHL Stanley Cup*, *Tommy Moe's Winter Extreme Skiing & Snowboarding*, *Actraiser*, *Turn & Burn: No Fly Zone*, *Ken Griffey Jr. Presents Major League Baseball*, *Tiny Toon Adventures Buster Busts Loose*, *F-Zero*, *Pilotwings*, *Contra III*, *Bugs Bunny Rabbit Rampage*, *Road Runner's Death Valley Rally*, *Mario Paint*, *Stunt Race FX*, *Super Mario All-Stars*, *Soul Blazer*, *Castlevania IV*, *Star Trek: The Next Generation*, *SimCity*, *Top Gear*, *Super Bomberman*, *Tony Meola Soccer*, *Wicked 18*, *Wings 2*, *Yoshi's Cookie* and many more classic games in every category including action, sports, adventure, RPG, puzzles and simulations. You could never duplicate these games on the Genesis except in name, and many of these games will never appear on the Genesis in any form. In other words, if you only own Genesis, you can't play these games.

## GET REAL, GET NINTENDO

So you spent your hard-earned bucks on the Genesis and now you can't play the best games. It may not seem fair, but it's not the end of the world. For less than the cost of a couple of Genesis games, you can have the system that gives you the best fighters with lightning fast control like *Street Fighter II Turbo*, the deepest fantasy adventures from Square Soft, Enix, Koei and Nintendo, the most challenging and creative action games like *Super Empire Strikes Back* and *Star Fox* and the most realistic and revolutionary sports games like *NCAA Basketball* and *NHL Stanley Cup*. The Super NES is the system with real power. If you don't have it, you're missing the real action. Get real. Get Nintendo.

Unlike over here, in Japan, comic books are read by almost everybody from preschoolers, to housewives, to businessmen. Just for teenage boys alone, there are several dozen books ranging from weeklies to monthlies. Once manga magazines for girls, women, and businessmen factor in, the number of comic books swells to over a hundred. (And that doesn't even include the vast number of fanzines!)

Out of all the manga magazines published, Shueisha's *Shonen Jump* is by far the most popular with circulation reaching six million. Amazingly, it is published once a week, which must be murder on the artists. A typical issue of *Jump* is close to 400 pages printed on cheap news stock jam-packed with about 20 stories. Plus, you get some change!

Quick to realize the crossover potential of their readership with video game players, *Jump* was a pioneer in the growth of gaming in Japan. For example, *Dragon Quest* (*Dragon Warrior*), Enix's groundbreaking RPG, was launched in 1986 with graphic and monster designs by Akira Toriyama, *Jump*'s top resident artist responsible for Dr. Slump and *Dragon Ball*. Initially *DQ*'s sales were sluggish as RPGs were entirely new at the time. *Jump* turned the tide by heavily promoting the game with strategy guides and other coverage. Thanks to *Jump*'s support, *DQ* went on to sell close to 1.5 million units. The entire series of games has posted sales of over 12 million.

Besides Toriyama, many of Japan's top manga artists, including Go Nagai and Bulchi Terasawa have at one

Wow, a game from Enix that isn't an RPG, and without a sword and sorcery theme. Not to worry, this manga and anime license looks pretty decent. Although the game is named after the munchkin hero of the anime, the game is played using Shintaro, a karate master. Formerly from an evil organization, Shintaro was beaten by Papupu and made his servant.

Shintaro must journey to a strange group of floating islands in search of his bizarre friends who have disappeared. Don't let the cartoony looks fool you, though. Enix did the challenging *ActRaiser* series. Like their recent games, this one is tough!

In fact, depending on your actions, the game could turn out in one of 48 different ways. A totally cool concept.

time or another written for *Jump*. Not surprisingly, a large number of *Jump* Manga have been turned into hugely successful video games, including *Dragon Ball*, *Fist of the North Star*, *Mazinger Z*, and *Cobra*. As of the latest issue, an astounding 10 of the 20 series have either been used as games or are about to be used. These include, of course, *Dragon Ball*, *DQ*, *Rokudenshi Blues*, *Slam Dunk*, and *Yuyuhakusho*. *Jump* also has the distinction of producing two RPGs, *Famicom Jump* and *Jump 2*, that featured many popular manga characters.

Few manga mags have managed to match *Jump*'s success. *Shogakukan*'s *Shonen Sunday* is possibly the closest competitor with an excellent stable of resident artists headed by Rumiko Takahashi of *Urusei Yatsura* and *Ranma 1/2* fame. Many *Sunday* mangas have been turned into games as well, like *Cyborg 009* and *Gosho Aoyama's Yaiba*. Takahashi has a bunch of games as well.

Wouldn't it be great if we could get 400-page comics for under two bucks? Gee, what a concept.

Many comics from *Shonen Jump* have become video games, like *Dragon Ball*.

Adventure

Unknown Price

Sega's first ever LD-ROM game for the LaserActive is actually a remake of an old LD arcade game by Data East. The game system is very similar to the pioneering *Dragon's Lair*, just watch the animated action and press the direction indicated by the yellow arrows that flash on the screen. You have to be quick though, or your hero will bite the dust. At points in the game, you'll be required to hit the attack buttons rapidly to build up strength.

Taking advantage of the LaserActive's abilities, this adventure is filled with smooth animation. A must-have if you own the system.

Try to get out of this mess of maggots, or you'll be eaten alive.

# INTERNATIONAL NEWS

Not only did I concentrate on news inside of Japan, I decided to check out what was happening on other shores.

You may not know it, but in Europe the Master System still has a strong following. In fact, there are many 8-Bit games over there that never appeared here. To keep up with the demand, Sega UK has created the Master Converter 2 which allows you to play Master system carts on the Mega Drive (What the Genesis is called in Europe, not to mention Japan.) in much the fashion as the old Power Base Converter. Do you remember that old item?

Well, it seems that the old converter isn't all that compatible to the Mega Drive 2s, a.k.a. the new compact Genesis. This converter plugs into the cartridge slot and allows you to play the extensive collection of 8-Bit titles, like classics such as the original Phantasy Star and Shinobi.

This goes to show how much the European market differs from ours. Will the Master Converter 2 come to the States? No one knows for sure, except for Sega.

## MASTER CONVERTER 2

The Famicom isn't dead yet! Perhaps we'll see this one appear on the old NES.

Unknown Release	Unknown Price

This is the sequel to Lufia (Estopolis), but not in story. Confused? This game is set 100 years before Lufia and stars the same heroes that were portrayed as a legend in the prologue in the first game. Do you remember that epic battle?

If you enjoyed Lufia, the sequel will add to your knowledge about the history of this mystic land. (Of course, if you haven't played Lufia, you can still get into this engrossing RPG.)

As a new twist to RPG combat, monsters are shown on field maps

similar to those in Square's Mystic Quest. Every time your party takes a step, they will step closer to you. So if you want to avoid combat, you'll have to think tactfully.

The odds are good that this terrific RPG will make it to the States, but I'm not promising anything. This is a great follow-up to Lufia.

The heroes will fight giant beasts often during this epic adventure.

In case of emergency, you can toss a few nasty spells at the bad guys.

The dungeons and mazes will require planning on your part.

Digital Comic	
April	Unknown Price

Buichi Terasawa (the former *Jump* manga artist best known for *Cobra*) has chosen 3DO as the full-motion canvas for *Takeru*, a manga about a futuristic thief. This point-and-click digital comic is beautifully drawn with digitized illustrations ported over from a Mac (on which Terasawa does much of his work).

There are 15 episodes so it looks like a pretty good deal. Although this isn't really a game, it certainly does suggest new possibilities for new multimedia software for the 32-Bit generation systems.

If you are a fan of Terasawa's work, this "DC" is something to consider.

Buichi Terasawa's *Takeru* is known as a digital comic with a lot of wonderful art that make up this action-packed story.

This digital comic has it all—action, suspense, and even a little romance thrown in for good measure. Everything a story needs.

Like the previous versions, plenty of new options will be given for your convenience.

## Taunting

Now the Rumik characters can taunt! Don't be fooled, for this will allow you to build up for a super attack!

A bit nitpicky about color? You can choose one out of four color palettes.

## Versus Mode

As always, there will be a two-player feature included that will let you play as 12 characters—so far...

First, you and your opponent have to choose your character.

Set preferences like color, handicap, and stage.

You can choose any stage to fight in and whatever character you wish to fight with.

## Tag Team Mode

Here's a nifty addition! In this Two-player Mode, call a second character in so that you can recover on the side!

## Member switching!

The way this works is if a player is damaged, he/she can switch places with the other and recover lost health!

The action takes place in an arena. Does anyone in the audience look familiar?

## THE GOOD

Plenty of special moves, great animation, and even super special attacks that need charging!

## THE BAD

The game suffers from an incredible speed deficiency. As of yet, there is no option to change the speed.

## THE UGLY

All the lovely voices from Genma's "Ha-Hork" to Kodachi's ear-grating laughter are included.

**B**ecause of the success of the first two Super Famicom titles, Ranma will be coming to the shores of Japan for his third appearance on the Super Famicom! Plenty of the best characters have been retained, with the addition of five new ones! Since we've seen the other characters from the last game (and are limited to two pages), we've detailed the newer characters as well as sneaked in many other characters for a few surprises.

Several new features exist in this version, like the choice of four different colors for your character. There is also a great new Battle Mode that lets you choose two characters and battle it out in a Tag Team arena! There are other differences, like the button config made up of two types of punches and kicks (a button each), and also the ability to taunt—which will build you up for a super special attack!

## Ground Zero, Texas Sony / Sega CD Gaming Strategies

Here are some strategies to help you in the game:

- Once a location is flashing, go to it even if you are engaged in combat with enemy aliens. If the new location you switch to is playing a video sequence you cannot interact with, push button A and START at the same time to shortcut through the SAT COM transmission.

- Whenever leaving a location, always put up your BattleCam shield.

- If you have a turbo controller, use rapid fire to stun the enemies.

- At the end of Level Two, you must input the Arsenal Access Code, which can only be obtained one piece at a time and only when you save an agent from being abducted. The heads-up display on the helmet does not display that information, so once you have obtained the code, write it down!

- You must blast the alien mothership's engine one to five times. The engines are located in the center of the ship and can be seen as a flashing red dot. Don't take too long, or you will be blasted!

## NEW SOFT NEWS

There are more games to be had than ever before. Look for lots of new systems, not to mention software. Pretty soon it will be too hard to keep up with the flow.

A lot of the really cool news can be learned in the Special Feature section, where you can see games like Daze Before Christmas and Speedy Gonzales.

TecMagik, who made the terrific Sylvester & Tweety game for the Genesis is planning on releasing a special CD version, with an additional level for the fans. Sounds cool.

The big news of the month is the announcement of Double Dragon V. Fans of the series should be thrilled by the new type of fighting action.

The Jaguar has been ominously quiet, but not to worry. Lots of cool games, like Doom, are scheduled to appear for it.

Sega seems to be riding high, with a whole bunch of projects for the Genesis and beyond. Makes you wonder where the next level will take us, doesn't it?

Here it is, the Next Wave section you all know and love. (I hope!!?)

## Steven Seagal: the Final Option

Super NES

Fighting

No it's not a movie, but it's pretty darn close to one. You play as Steven Seagal, out to take on the forces of crime as a one-man army. As you brave the many levels, you must master moves which will keep you from an early grave. And when fists aren't enough, you have your blades and your gun.

Steven himself was an active participant in this game. All the characters are digitized and retoscoped for a new level in realism. The time has come for the Final Option.

Seagal must take on the forces trying to destroy him in Final Option.

Begin the war at the very heart of corruption itself. Take no prisoners.

Avoid the crushing beams, and pummel the criminal scum.

Take on a great deal of rubber monsters from his past films, like Gigan, Mechagodzilla, Biolante, King Ghidra, and Mecha Ghidra. Being a CD game, you can bet on rockin' tunes and roars straight from the films.

No rubber monster fan should go without seeing this one. The graphics are great, complete with fiery backgrounds and charring tanks. This game allows you to play as Godzilla himself, or one of his many adversaries for one giant battle.

The Duo is making a comeback with this terrific fighting cart that brings out the beast in you.

Godzilla and the others have special attacks that you've seen in the movies.

Play as character versus character, or even as the other monsters!

## Soccer Shootout

Super NES

Sports

Soccer is fast becoming the most popular sport in the world. Capcom's latest soccer title takes advantage of this trend, and makes a highly playable game as well. Choose from six modes, and play with multiple players. What's cool is that you can practice all the moves that will lead you to victory.

There's both indoor and outdoor fields, and each has its own play mechanics. The players have a lot of moves, ranging from heading the ball to bicycle kicks.

If you are a sports nut, you'll find that Soccer Shootout has everything you want from a soccer game.

In the case of a tie, you can have a shootout to decide the winner.

Use a wide variety of techniques to get to your opponent's goal.

Play indoors for a few new dimensions in game play. Rebound the ball!

**Ballz**

3DO

Fighting

Ballz is a fighting game like no other. Your characters are made up of a number of balls of different colors. They have been arranged in various recognizable patterns to make up the fighters. Some of these range from a kangaroo to a ballerina.

The visual effects are really cool, as each character has several moves, and you can now move on a three-dimensional plane. This adds tremendously to the amount of technique involved.

There aren't that many 3DO fighting games out there, and Ballz really stands out. This is worth seeing, because it's so different from others of its kind.

To add some interesting features, Ballz has a three-dimensional plane that you can use to plot out your battles. This adds to the game.

Using the plane gives you many strategies, from a game of keep away, to aggressive attacks from the side. Overall, it's really cool.

Play as a bouncing kangaroo with punches.

The superhero has a bunch of strong moves.

What the heck is a ballerina doing here?!

The killer clown is not too friendly either!

If you have to have every fighting game, this one is sure to catch your interest and find a place in your collection. There aren't many great fighting games for the Sega CD.

## Warlock

Super NES

Action

Watch out for bridges that will collapse as you walk across them.

Journey through caves and the dungeon of an ancient castle.

The graveyard scenes are teeming with the walking dead.

# WARLOCK

Warlock is a terrifying action game where you must take on the forces of darkness. You are armed only with your reflexes and magic abilities. The line between reality and nightmares will blur, causing you to go up against the unspeakable.

You will gain your magical powers slowly, but they will not do you any good if you are dead. You will be able to project flames and shoot blue power bolts. Use these on the many minions of evil. Perhaps you will become

one of them ... if you fail.

The graphics are decent, and use a large color palette. The backgrounds are drawn with eerie detail and can get mighty spooky. The music and theme is also very dark, adding to the overall mood.

Warlock will take your game playing skills to the max. Only the best players will be able to enter its darkness and win. Are you good enough to stop the evil once and for all?

## Dark Wizard

Sega CD

RP6/ War Sim.

An evil god has been set free from the Jewel of Darkness. The last stand for the forces of Light is the Kingdom of Quentin. You must gather your forces and take on the evil first hand.

Dark Wizard is sort of a cross between a fantasy RP, and a military simulation. Sort of like Shining Force, but with CD effects.

I highly recommend this game, if not for the fact that there are pitifully few games of this type. Dark Wizard has all that you'd expect, with great cinemas and awesome music.

Beautiful cinemas really put you into the plot of the game.

The evil forces are planning on destroying everything good.

The battle scenes are played out in a fashion similar to Fire Emblem.

Data East

## Side Pocket

Game Gear

Simulation

Nothing is more relaxing than a game of pool. Data East is bringing their great pool simulation to the Game Gear, with most of the game intact.

This game of pool plays surprisingly well, and the balls are easy to see. Aside from the normal game, there also is a mini game of trick shots, where you must test your skill.

This is a great translation of the 16-Bit versions. The layout is the same, and even most of the graphics are recreated here.

How Data East has managed to squeeze this game onto the Game Gear is beyond me. If you want a nice relaxing game of pool on the go, Side Pocket is for you. It's a bit different from all the regular games.

Play a regular game of pool in a nice relaxing setting.

If you want a real challenge, try your skills at the trick shot game.

Data East

## Outrunners

Genesis

Driving

The hot racing arcade smash is finally coming home! Data East is bringing it to the States, along with all of its non-stop racing action.

Play the Arcade Mode or the original version. Select your car and get ready to roll.

The game can change every time you play, because the checkpoints you reach can take you anywhere.

Like the arcade, this one has great animation, and the sound isn't bad at all.

If you are in the mood for some hot racing action, Outrunners will blow you away. It is one of the best racing games around.

Drive right by the waters of Niagra Falls. Isn't it romantic?

Watch out for those cowboys moseying around the plains.

Racing at high speeds can be hazardous when you hit a cow.

# EVERYTHING ELSE IS JUST PRACTICE.

## INTRODUCING ESPN BASEBALL TONIGHT.

ESPN Baseball Tonight, the video game, has arrived, and it blows the other games right off the field. We started by filming real baseball players. Then we digitized them. The resulting animation is smoother than a well-oiled mitt. With unprecedented batter control, super responsive "touch," and Chris Berman in the booth, this is the most realistic baseball simulation ever.

So if you've been playing those other baseball games, put them away. You've had enough practice. (Now available for Sega Genesis. Coming soon for Super Nintendo and Sega CD.)

Actual players filmed against blue screen for the most fluid player movement ever.

Unheard of bat control. Normal, high and low swings.

Chris Berman reports 'live' from SportsCenter and Dan Patrick calls the play-by-play.

# SUPER STREET FIGHTER II TURBO

New opening screens featuring Cammy, Chun Li, Ryu, and Akuma greet players.

## YOU MUST DEFEAT SHENG LONG TO STAND A CHANCE.

The best just keeps getting better! This complete Street Fighter experience finally features many of the techniques and additions players have been begging for. Most noteworthy of these changes is the appearance of a secret character, Akuma!

To beat Akuma, you will need full control of the new

Super Combos. When your Super Meter is fully charged (by using special attacks), you may unleash a fury of attacks which have the potential to drain half of your opponent's life-gauge! These Super Combos can be used in normal combos for killer results. If you finish an opponent with a Super Combo, you will see a burst of light, along with a special Bonus!

Each character has different colors on this new Character Select Screen.

Here's a quick list of some new features in this phenomenal upgrade:

1. Hidden Boss, Akuma!
2. Super Combos!
3. Recover from throws with little or no damage! Timing is the key...
4. New attacks for each warrior!
5. New Opening & Select Screen!
6. New ending pictures!
7. Controllable game speed!
8. No bonus rounds!
9. High computer intelligence!
10. New bonuses!

What will be left for SFIII?

 All 3 punch buttons in air  
 You can use it in a combo!

He dashes and strikes low!

Super Dashing Uppercut

Charge ◀ ◀ ◀ ◀ ◀ +P

Charge ▶ ◀ ◀ +K  
A backflip that triple-hits!

Rolling Liza Drop

Charge ▶ ◀ ◀ ◀ ◀ +K, ▶ +P (near)

# SAGAT

Besides better speed, Sagat has learned to control his Tiger Uppercut, granting him multiple hits! Up to five hits can be had, but the damage is lessened.

**MULTI-HIT UPPERCUT**  
▶ ◀ ◀ + Fierce  
Can you say instant 5-hit?

Tiger Genocide

▶ ◀ ◀ ◀ ◀ +P

# M. BISON

The only poor M. Bison has learned is how to control his Devil Reverse Punch in the air. His torpedo only hits blocking opponents once.

**DEVIL REVERSE PUNCH**  
Charge ◀ ◀ ◀ +P, P (to enemy)  
Extra control = deadly hits!

Knee Press Nightmare

Charge ◀ ◀ ◀ ◀ +K

# AKUMA

This hidden end-Boss is shrouded in secrecy, but we've managed to get some pix of him in action! His arsenal consists of attacks from Ryu and Ken, as well as a few new ones of his own, like his Mid-air Fireball! Can we say die? He takes out M. Bison to start Round One, and then you must face him alone. Think fast, because his speed and strength are second only to Sheng Long! One word of warning, gang! Don't call Capcom trying to find out how to get to him! Not even their experts have figured it out yet!! If any of you gamers figure it out, write to Trickman Terry!

# BLOOD WARRIOR

This gory fighting game by Kaneko lets you choose from nine ancient fighters. Each character has a very different fighting style along with several unique special moves. As its title implies, the blood really flies when you slice and dice your opponent into ribbons.

Pick from the nine feudal Japanese characters and go after your opponent for blood and honor.

# BATTLE K-ROAD

Unlike most fighting games, Battle K-Road by Jaleco uses a single elimination tournament with six rounds. There's no hack and slash here. You must time your moves and hit first or lose the round. Special attacks are simple to do—just hold and release a button while moving the joystick. A more simplistic type of fighting game, but with all the fighters and strategy you ever need.

# WORLD HEROES 2

More than just an upgrade, W.H. 2 Jet by SNK is a whole new ball game. For starters, there are awesome new cinematics, cool bonus rounds, and tons of new ways to play.

But that's only the beginning—there are two new guys as well as a slew of new moves for each character. Look out SF 2!

Old moves and new ones!

Select from 16 characters including two new guys, Jack and Ryofu!

Four types of competition will test your might!

Choose between one or three fall matches.

# MORTAL KOMBAT II

Making an appearance at the show was the hot sequel *Mortal Kombat II* by Midway. The gory second installment has been number one in the arcades but finds a little trouble holding up to its biggest rival, *Street Fighter II: Super Turbo*. Still, we all know that MK II has a lot to offer and we are assured by the programmer, Ed Boon, that there is still a lot left unknown. The current version 3.1 is said to be the final version and an upgrade isn't planned to appear any time soon. This version has all the techniques that the others were lacking, along with a few other surprises. Its mass appeal and controversy will keep it going long into the home market. Anyone know the Kano transformation?

Moves like Kung Lao's Friendship are now programmed in. Try (B,B,B,D+HK)

Even Shang Tsung's Pit is in the final version. (hold block D,D,U,D)

BloodStorm by Strata is the first fighting game with a password. When you defeat an opponent, you gain his/her special power. Also, each character has an ejectable gauntlet that can be picked up by your foe and used against you. ## FROM OUT OF NOWHERE, DATA EAST LAUNCHES A NEW TYPE OF FIGHTING GAME!

And you thought that fighting games were old news. Well, think again fighting fans! Enter a new breed of fighters in Fighter's History by Data East.

## Data East wins court ruling over Capcom.

### Fighter's History ▲

### ▼ Street Fighter II

The Federal District Court in the Northern District of California denied Capcom USA, Inc.'s motion for a preliminary injunction enjoining Data East's marketing and distribution of Data East's video fight game "Fighter's History" and any newer versions of that game. Capcom claimed that Fighter's History infringed Capcom's audio visual copyright for its Street Fighter II family of video fight games. Capcom also claimed that Data East had copied the "total concept and feel" of Street Fighter II in addition to copying certain fighter characters and special moves. The court held that "Data East has not captured in Fighter's History the "total concept and feel" of Street Fighter II. Rather, the similarities that result between the two games stem from Data East's emulation of the unprotectable, commonplace features of Street Fighter II, such as its stereotypical fighter characters and its reliance on unoriginal fighting techniques derived from martial arts. The court further held that "Capcom cannot now withdraw from the public domain ideas and standardized expression ... To do so would be commensurate to awarding Capcom a monopoly over a range of characters and moves that it did not create. It would also allow Capcom to lay proprietary claim to all reality based fight games featuring human characters. Copyright law affords no such protection!"

# BATTLE CORPS

FUTURISTIC GIANT MECH BLASTING  
ACTION FOR THE SEGA CD!

One of the most well-known companies in this industry (ever since the Amiga was perfected) is Core.

Producing many classics like Chuck Rock, Son of Chuck, and other titles for Virgin games, Sony Imagesoft, Tengen, and countless others, Core will soon be re-entering the Sega CD platform with more stellar hits!

Core's first CD title ever produced for the system was the JVC cutesy cuddly Wonderdog, which contained some of the most vibrant graphics at that time. Now having dabbled further with what the system is actually capable of, the gallant design team is now producing some incredible pieces of CD software, all of which contain plenty of Mode 7 scaling (a Sega CD option that has rarely been touched). The first is an incredible mech simulation game entitled Battle Corps. In the vein of AH-3 Attack Chopper by JVC, this title puts you behind a seemingly real mecha that is loaded with all kinds of weapons. Blast other enemy combat units, while watching your back and also where you walk. The second piece is Should Star, a title that combines all of the greatest ideas of the Galaxy Force genre of games into one super soft. Finally, there is a racing title being produced. Entitled Chuck Rally, this game will provide racing fans with a new twist to what racing is all about. Being one of the leaders in software developing, Core will definitely have a happy '94 filled with nothing but outstanding titles! Keep it up, guys!

Entering a genre of game titles that is growing in vast numbers is the giant mech simulation of Battle Corps. Similar to the style of AH-3 by JVC, Core has created a first-person viewpoint from within the cockpit of a futuristic mech. Your targeting is centered with the crosshairs that stay stationary throughout the game, and with this guide your aim will be at the most effective. The weapon selection contains several nifty items of desecration, however most have only limited rounds. You must also be careful should you be a trigger-happy little player, because the gun barrels will overheat and your vehicle will be damaged. The actual game environment is very clear and is in a 3-D environment providing the top-notch feeling of piloting a giant mecha. Even the cockpit bumps up and down with the thunderous footsteps of your mighty machine. Presently, Core only has the volcanic level complete, but there will be more on this as it comes to us!

Within this Undersea Level, ships will sail over you while bombarding you. It's nuts!

Turrets and tank mechas patrol the Volcanic Lands.

There isn't a lot of dry land, so you'll have to touch the lava often.

Wriggle past icy mountains and other obstacles in this Arctic Zone.

## THE MECH IS ARMED WITH VARYING WEAPONRY.

These shots are standard.

More powerful than standard.

A nuke that packs a lot!

Will home in on the enemy.

Torches nearby enemies.

## INTERSTELLAR MODE? COMBAT UPON THE SEGA CD SYSTEM!

Fans of the Galaxy Force series of games will be pleased to see the creation of this great looking CD! Filled with plenty of scaling and rotating objects, the minds at Core will have a superb game ready that combines all of the major shooters of this genre. You'll have to zoom straight across actual landscapes to blast them up. Several space scenes feature dozens of ships attacking from all angles with levels that give you full 360° control of where you travel on the landscape. Within these stages, you can search and destroy specific objects and also try to locate the exit. With those options at this point in the development, this should be a treat to shooter fans everywhere!

## INTENSE STELLAR COMBAT!

Within the space battles, ships will zoom in from all corners of the screen and even enormous

battleships will sail past the battle scene, sometimes right at your ship!

## PLANET SURFACE BATTLES!

On the planet surface, all types of walking robots, buildings, and terrains will

be standing in your path. Dodge or blast them to infinity to get past swiftly.

## PLENTY OF WEAPONS, EACH HAVING ITS ADVANTAGES AND DISADVANTAGES

The Ripple laser isn't good in space, but great for clearing the landscape!

This missile barrage will chase down any ship that just happens to appear!

## FULL 3-D LANDSCAPES!

Enter a perspective where the whole landscape rotates about your ship!

Locate the core of the gigantic space fairing vessel and head out before it blows to pieces!

The standard twin blaster has great power and is really good in 3-D zones.

## SCALING BATTLE SHIPS WILL BE HEADING YOUR WAY!

The pot-bellied cave man and clubbin' son have returned! This time, it will be in a cartoon-like racing game that will make you laugh like the belly buster himself. It will also provide enough challenge to make you sweat till you're dead! These "works in progress" pix show you just what Core is up to. Utilizing lots of scaling techniques, this racing title will go far beyond normal racing games, with shortcuts, traps, and the threat of other drivers.

# SPECIAL FEATURE!

Malibu Comics is delving into the video game market again with three new titles for various systems! This transition from comics to video games is not uncommon with Malibu. They have done some earlier titles such as *The Ex-Mutants* and *Dinosaurs for Hire*. With all of these new games coming from the *Ultraverse* comic series, they are sure to give superhero fanatics a taste of pure power! Take on the villains with these video game translations of three popular comics in the series!

Prime may be a genetic experiment, but he's also the protector of the innocent and the exposé of the guilty, who is ready at a moment's notice to fight evil. If he's not withstanding damage from missiles, he's battling demons that take on the form of Saturday morning cartoon characters! This is one teenager that has more muscles than the whole senior class put together!

Firearm is an English private detective whose gun does more of the talking when the going gets tough. His real name is Alexander Swan, and he gets hired to crack some of the toughest cases. Most of them require the use of explosives to get him out of trouble. The Ultras are always after him. Can you keep him alive for his next case?

The Strangers are a group of people who gained super powers by a freak accident with lightning. Each one is now learning his/her capabilities and powers and what to do with them. All six of them find out that they have something in common. The morning before the accident, they had nothing in common, but now, they are the Strangers!

While going through the game, you will be attacked by surprise missiles. Look out!

While bashing heads and delivering super attacks to your enemies, you will find yourself getting hit by the villains of the game.

## POWERFUL ATTACKS!

# FIREARM™

Another title in the Ultraverse Series, Firearm (for the Super NES and Genesis) lets his powerful weaponry take care of his problems and this game features a lot of it. Everything from homing shots to plastic explosives is here. You'll find yourself in an untamed mix of action and destruction as you seek out those who are bent on killing you.

Firearm takes place in a variety of locations. At the time these pictures were taken, only two levels were complete enough to be shown. The level in the sewers features enemies that smell almost as bad as the flowing, green sewage you see everywhere. The next level was a rooftops level that was very incomplete but has plenty of enemies scurrying about.

This second game in the Ultraverse lineup shows exactly what these games are all about; Reliving the comic series in a way that's both fun and offers action that rivals the comics themselves.

Knock out those pesky overhead attackers by shooting diagonally with the gun.

No one leaves you alone, not even on these desolate rooftops by the city.

# THE STRANGERS™

While only in its infancy, The Strangers is going to be a one-on-one fighting game for the Sega CD. It features characters straight from the pages of the comic book, plus three new characters made specifically for this game. The pictures you see here are very preliminary, yet the attention to detail in the characters is superb. We'll have more info on this title as the work continues but for now, enjoy this character roster and get set for another terrific fighting game, only from the minds at Malibu Interactive.

The Character Selection Screen shows a few of the characters' profiles as they'll appear in the game.

Your wish is our command. Did you wish for Aladdin on Game Gear™? 'Cause that's what you're getting. You've got the lamp, the magic carpet and Princess Jasmine. Things are good. In fact, the only thing that might worry you--just a little--is that the most powerful and twisted guy in Agrabah wishes you were dead. But you're Aladdin. Don't let it get to you. Have a good time. Visit the Sultan's Palace. Check out the Cave of Wonders. And most importantly, teach Jafar something about the business end of a scimitar.

## Disney's Aladdin

Dodge flame bursts, burning lava and rocks on your magic carpet. In short--escape the Cave of Wonders before you become a shish kebab.

It's come to this. Good vs. Evil. You vs. Jafar. Seem like a fair fight? Well, he's got the lamp. Then again, you're Aladdin. You'll figure something out.

He's a cobra. A big cobra. And he's a little upset. Use that scimitar to let him know what's up. (It's the only thing he'll understand, trust us.)

Samus has finally made it to the 16-Bit realm! This title takes place right after the first two games (as documented in the intro), where a baby Metroid has followed Samus back home, and it was then tested for human use. Suddenly, the base was attacked, and the baby was stolen. So now Samus must return to the planet Zebes (which even continues the destroyed remains of the mother brain room) to stop whatever sinister plan the aliens have for the infant energy sucker.

The entire planet is huge, containing several pathways and hidden rooms that link up with other levels from time to time. All of the original weapons are here plus a whole new roster! Definitely an incredible hit!

In the beginning, you will start on the surface of Zebes, and then you will have to go through the exit where the first game ended and find the morph ball, missiles, and bombs.

# BRINSTAR

Within the realm of Brinstar, the walls are covered with vegetation. Creatures swarm out of pot-holes to attack you. Keep your guard up when you fight the giant plant.

Be careful when you get the bombs. The statue will come to life and attack you!

This swinging plant can only be destroyed by hitting the insides of its "Mouth."

## THE VENGEANCE OF KRAID!

Returning from the original Metroid is Kraid! First you must fight his mini-clone

outside his lair. Then you must take on his main form—and be prepared for a shock!!

He walks, he kills, and probably is related to Godzilla! Kraid is an enormous monstrosity that attacks by firing spines from his body. His mouth is the weak spot on him!

## THERE ARE A TOTAL OF SIX LANDS, ALL OF WHICH ARE LINKED IN VARIOUS WAYS!

Enter the Wrecked Ship from the outside land of Cavernia.

The wrecked ship will have plenty of hidden items about.

- FLOWER**

**O**ne of Disney's animated classics can now be played on your SUPER NES. All of your favorite characters are featured here.

You play as Mowgli—a boy who has been raised in the jungle by a pack of wolves. You will have to go through the jungle and other areas where Shere Khan's henchmen are waiting to give Mowgli trouble. Don't worry, help is on the way. Rely on Baloo to give you items to use against your opponents.

To survive in the jungle, you must master many moves that will enable you to handle the jungle's obstacles. Friendly animals or insects will be here to help you. Master the environment and become the king of the jungle.

Look, it's one of your friends—Baloo. He will appear in various places where he will drop items ... like these bananas.

## ACT ONE: TRAINER LEVEL

Test your skills by jumping and swinging on vines while avoiding the monkeys and giant, jungle insects. Look out for the dangerous plants, as well.

## ACT TWO: JUNGLE BY DAY

In the heart of the jungle, jump across many obstacles. Here you will have to jump on leaves, platforms, and even parrots to reach the top.

Kaa the snake is very tricky. Watch where he will pop out while avoiding his attacks. Throw fruit at his head.

### THE GOOD

Disney is known for their animation and the animations of Mowgli are incredible—like watching the movie.

### THE BAD

Many moves will take time and practice to master. Controls are sluggish at first, but fair.

### THE UGLY

If the animals are your friends why are they attacking you? Hmmmm.....

## ACT THREE: KAA THE SNAKE

This is just a small sample of how the tree looks. Climb up to meet Kaa. Monkeys, birds, and even killer bees will try to stop your progress. Be careful!

## ACT FIVE: TREE VILLAGE

Huts on treetops! This stage can get difficult ... you will use all of your jumping and swinging here. Timing is the key.

## ACT SIX: PARROT RIDE

Here you will have the chance to ride the giant parrots while shooting bananas out of the parrot's mouth. Flying squirrels are waiting in the trees to attack you.

## Two game modes!

The unique game play is made up of one section that is played like a board game—throwing dice. Where you land is where the action is.

## To the Park for prizes!

## The Cafe

Should you be a bit low on life, get to the cafe where you can stock up on health before pressing up further.

Pachinko, anyone? Shoot the armadillo and score big time!

Get your throwing arm ready! You'll have to hit the power-ups!

## Training

Beat the course in time and get a double jump!

## Da Boss

Meet Bosses one through three here.

Whack the monkeys' behinds before they get to the nuts!

The classic game of concentration will baffle you.

## THE GOOD

The Mario-ish game plan combined with plenty of unique options make this an extremely fun title!

## THE BAD

Why is it that a good 75 percent of the time that you jump, the whole game slows down astronomically?

## THE UGLY

Is it me, or does the sight of Fred Flintstone winning a race against a thinner opponent just seem wrong?

## EGM X-TRA DARE TO COMPARE

A LOOK AT OTHER FORMATS...

Unlike the Genesis version (shown below), the SNES title is played out very similarly to the Mario brother titles, having an overworld land that is made up of several sections that you can hop from. Definitely fitting.

For those of you who definitely want the old, but with a whole lot of new—this is the game you've been waiting for! The popular Hanna Barbera title by Taito is an extremely well thought out title that combines the overworld premise of the Super Mario titles and adds a whole lot more! First of all, you will be able to play as two characters, Fred and Barney. While on

your quest to find the Water Buffalo treasure, you will need all your skills to make it out alive, from performing double or triple jumps (if you beat the stadium timer twice), to clubbing dinos, to giving yourself some limited hover time by frantically flapping your arms. All will be needed in order for you to survive the perils of the four islands and the even more dangerous cave system below!

# BEDROCK MAGMAROCK

Enter Fred's hometown, where gorillas run rampant and lots of dashing dinos race down the streets plowing over anything in their way! Be sure to hit the parks.

This is the place to get a prehistoric hotfoot! Volcanoes will spew boulders into the lava, and timed jumps are incredibly necessary. There are lots of parks to explore.

## Boss 1 - Rockhead

Rockhead shows up, and he has the map of the islands! He's a sporting kind of a guy, so he challenges you to a race. If you win, the map is yours.

## Boss 2 - Quartz

Quartz will also be looking for the treasure. After a short bit of yapping, he will challenge you to a cart race. Watch out for mud and finish before him!

# SNOWROCK JUNGLEROCK

Searching for some ice pics that can remove the needed compass, you'll come across plenty of slippery moments, as well as traversing the random sliding pathways.

The compass has been stolen by a Pterodactyl! Get it back in order to find the entrance to the hidden cave where the fabled water buffalo treasure lies waiting.

## Boss 3 - Marble

Marble has the ice tools you need to get the compass out of the ice, so he challenges you to an ice skating tournament. It's Fred on ice!

## Boss 4 - Pterodactyl

The giant Pterodactyl is waiting for your move! Knock it senseless while trying to avoid its swooping attacks and the boulders it will throw!

## Two-Player!

Yes! You and a friend can join King Arthur on the quest for the grail!

It was bound to happen. The incredible success of the arcade smash has now been brought to the screens of the Super NES! The game is played in the usual side-scrolling manner, but there are many differences that make this title unique from the rest. First off, you have three characters to choose from. There is also the possibility that you'll get the opportunity to find a sturdy mare to ride upon and double your attack power.

## THE BAD

You can't grab the enemies like Golden Axe. The last three Bosses beat you with three hits!

## THE UGLY

Scorn laughs like a seal lion! I'm shocked he didn't clap his hands and balance his pike on his nose!

But the most unique feature is a level-up system where your character will become more powerful and even change into a different, more experienced fighter upon reaching a certain score! You can also have a friend join in to increase the amount of fun when storming a castle! A nice conversion that should please any fan of the arcade game!

## The Level-Up System

If you score a set amount of points, your level will increase.

## The Mighty Mare!

## Level Two: Forest War

### Boss Two: Braford

Stage Two will have you battling your way through forests and prairielands. Once you make it to the castle entrance, Braford the swordsman will attack riding atop a gallant mare!

Watch out for massive troop attacks and diving hawks with knives in their talons.

Within the forests, there are plenty of barrels filled with useful treasures to help.

## Level Three: Castle Siege

### Boss Three: King Arlon

You now enter King Arlon's gigantic castle. Here you will be able to get a horse for battle. Be careful when you meet up with the Silver King himself. He's really tough!

Watch out for pouncing tigers. Be sure to slit their throats before they attack you!

Have your steed ready when entering the castle. The enemies are powerful.

### THE GOOD

The different two-player modes the game has to choose from give you a variety of game play.

### THE BAD

The computer is adept at hitting your tank from off-screen, making the game frustrating at times.

### THE UGLY

At later levels you have the stealth assassins whose invisibility and speed can be difficult to deal with.

Enter the Cyber-War. In Spectre, you see a virtual world from the point of view of a battle craft—a "Spectre." Roaming around computerized arenas deep inside a massive cyber-net, the object of the game is survival. Shoot your enemies, collect ammo and flags, avoid mines, and race on to higher level arenas. In the two-player game, battle with a friend or ally against the denizens of the Cyber-net. Arm your tank and launch yourself into hyperspace in a battle to see who is the champion of Spectre.

### CONTROLS

**BUTTON "A":** Fires Cannon. Uses one round of ammo. This will not always kill your target.

**BUTTON "B":** Fires grenades. Uses 10 rounds of ammo. More powerful than the cannon.

**BUTTON "X":** Hyperspace. Teleports you to another area of the playfield. Requires a lot of energy.

**BUTTON "Y":** Jump. Your tank jumps in the direction you are moving. Also requires the use of energy.

**SELECT:** Selects Option Menu.

**START:** Pauses game.

**LEFT/RIGHT:** Turns tank left or right.

**UP/DOWN:** Moves tank forward and backward.

# SPECTRE

## SPECTRE

If you choose the Two-player Option, you have four different games to choose from. You and another player get a Split Screen View where you play cooperatively, in competition, free for all, or attempt to capture the other players flag.

## 2-PLAYER

Your mission is to collect all the flags on a given level while taking out enemies in your path. If you sustain too much damage or run low on ammo, search for refueling points to replenish your tank.

Often your screen will flash, indicating you have been hit, even when there are no enemies on screen. Use your tank's radar to see if you are being attacked from behind or by a tank out of your visual range.

Use the numerous obstacles on each level to defend your tank as well as to attack other tanks. Be careful maneuvering around the obstacles; there are many traps which will deplete you of energy if you run over them. The traps are marked yellow and black or red, indicating danger.

If you're constantly running to the arcades to get a racing fix, wait no longer! Suzuka 8 Hours, the game that gave head-to-head racing a whole new meaning, will soon be coming home to the Super NES! Tear up and down the track on a choice of three super bikes and battle it out with a partner on the Split-Screen Two-player Mode. Or for the true test of stamina and endurance, race against the toughest riders in the world. Five courses are guaranteed to not only challenge you, but to put you in the hospital as well. Either way, if racing is your bag, then grab your helmet and get ready

Before the race choose four different race times, all the way up to eight hours. Eat your Wheaties!

Your bike can be tweaked for acceleration, max speed, or cornering with a manual or automatic transmission.

Keep an eye on your speedometer and the warning arrows when heading into the hairpin turns.

It's always a good idea to keep a safe following distance when in the Two-player Mode, or else there could be a mess!

After the race, check out your lap time, and how many points you've earned on the tour.

If you've got what it takes, you may get picked up by a sponsor for better results.

### THE GOOD

Most of the features from the coin-op were kept intact. I like the Two-player Split-Screen Mode.

### THE BAD

The control of the bike takes a while to get used to. The sound also needs help.

### THE UGLY

Anytime you're dealing with motorcycles, the ugliest thing is always crashing. Bring your helmet!

## Bonus Levels

In this awesome puzzle game, there are three different bonus games. You can get to the first bonus level by clearing the entire board. The second bonus level is reached by having 50 or more tiles on the board when you win. The third comes when you complete a box with 15 or more corners.

**T**his is a very interesting twist on normal puzzle games. There are eight different pieces to use and they throw so many at you that you are constantly getting confused. You must take these pieces and place them in the playing field (one by one) to create continuous loops—or loopz. And as if that isn't hard enough, you have a limited amount of time to use each piece. The higher your difficulty level, the less time you have to use each piece. If you don't use a piece in the given time, it blows up and you lose a life. That makes this game very tough until you become familiar with the speed and game play. The levels are neat and the little animations behind the playing area are cute. The Head-to-Head Two-player options are great for constant competitions with your friends.

In this two-player game, you and your friend work together to complete each level. It makes the game extremely tough because you don't always know what the other is thinking. See how far you think you can get.

## Always a Different Game!

Each level in the game gets increasingly difficult the higher up you go. Every third level you get to a new scene. For example, the jungle is the first three levels. The water scene is levels four through six. The cheese is levels seven through nine.

This is the challenge level where you go head-to-head with your friend. Compete to get more points.

### THE GOOD

This game is very intense. The puzzles keep you coming back and the game is always different.

### THE BAD

This game is so addicting I didn't want to leave the screen for a second.

### THE UGLY

My attitude toward the other guys, because of the large amount of sleep I lost playing this game.

In this game, you can jump off the ropes and smash your opponents. This move can do a lot of damage, but be careful—miss and you will hurt—bad.

Take the action out of the ring to do some *real* damage to your enemy.

# STREETS OF RAGE

# 3

Let the head-busting begin! The vicious syndicate is back in town and Axel Stone stands falsely accused of crime. Axel, Blaze, Sammy, and a new brawler, Zan leave a trail of smashed heads and mortally wounded scum. The mob is meaner than ever!

The biggest brawl just got bigger with 24 explosive megabits of dynamite graphics and arcade-style martial arts slaughter! Veteran bashers Axel, Blaze, and Sammy from the second adventure are joined by newcomer Zan, a specially trained combat cyborg. The game is rich in action and is loaded with improved fighting skills, lung buster punches, killer throws, skull-shattering kicks, and mortal blows! There is also an enhanced Two-player Mode for cooperative mayhem. Or blow off steam beating the daylight out of each other in the Head-to-Head Mode.

### THE GOOD

Probably the most impressive graphics I've ever seen.

### THE BAD

The music isn't as good as the music on the first two games.

### THE UGLY

The Mid-Boss in the first level should be taken out.

## WEAPONS

### 2X4

Grab the lumber and hack away at the attackers.

### KNIFE

Inflict more damage with the knife.

### SWORD

Increase your reach with this long sword.

Choose your favorite character and see how you match up against your opponent.

Be very cautious in the warehouse as there are many syndicate thugs hiding about.

Many bikers roam the streets in the beginning of the second round.

## ICONS

### MONEY BAG

Add to your total score when you pick up money bags scattered about.

### APPLE

Replenish a portion of your health with a bite of the apple.

### TURKEY

Replenish most of your health when you bite into a whole turkey.

## BATTLE MODE

You can even play in a same Character Versus Same Character Mode.

## ROUND ONE

Blaze shows off her knife skills to some baddies.

Carefully knock the bikers off their cycles.

The first Boss is highly skilled in throws and is very adept at long-range kicks.

## ROUND TWO

Robots and kangaroos fight in the game as well.

Axel uses a 2x4 found in the club on an attacker.

The second Boss is a set of two females who use jumping and throwing tactics.

## A GAME OF ARMORED COMBAT

### THE GOOD

The animation, control—actually the entire concept is fabulous!

### THE BAD

Sliding around on the ice right into the wall of spikes is definitely not good, but it looks very cool.

### THE UGLY

The scene where your Mech gets killed and you see the wreckage of that beautiful machine!

**I**t is the 28th century, where huge 40 ton man-shaped armored vehicles fight desperate battles for control of distant remote worlds. BattleTech is a game of armored combat that is based on the hit role-playing board game. In this game, you control one of the mighty

Mechs, on an intense 3-D playing field, and are pitted against five formidable enemy clans in 25 different missions over five different land types.

Or if you're feeling really gutsy, you can go head-to-head with another Mech in a tactical struggle for control.

## MISSION 1

You will start your Mech adventure in this mission. Destroy the different radar sites around the playing field. As you stomp around the level, dust flies up around the feet of

your huge armored warrior, and you hardly even notice things like the enemies' ground units and buildings!

## MISSION 2

The huge canyon walls of Mission Two form a maze-like level that you have to work your way through in order to eradicate the enemy. Small ground units and other Mechs are everywhere.

If you let yourself get surrounded, you will be in a whole lot of trouble.

Destroy the enemies so all that is left of them is a scorched piece of earth.

Take it slow and destroy everything as soon as you see it.

Remember where you have been so that you don't go around in circles.

Even the small ground troops can be a problem if you don't kill them fast.

## MISSION 3

This is a partial map of Level Three. This level is on an ice world where you will put your Mech in a lot of danger, because when you get on the ice you slide right into the walls made of spikes. There are also some really dangerous enemy Mechs that will surely give you a lot of trouble.

## MISSION 4

Here in Mission Four you must take your Mech through a maze of canyon walls in order to seek out and destroy the enemy. Your Mech is almost unstoppable and can blow through just about anything in its way, sometimes even the walls!

Search through the level to find the enemy encampments.

Don't worry; the rocks in your way are no match for you.

These guys shoot showers of bombs into the air to take you out!

Watch for the smaller but faster ground units—they are everywhere.

## THE GOOD

The first game was great, but the second is nothing short of excellent. Great tie-in with the first one!

## THE BAD

The only bad thing about this game is that it might not be out for a couple of months. I can't wait!

## THE UGLY

The big black beasts that keep knocking me down on the ground. Why can't I run faster?

**H**eat of the Alien, the sequel to the smash hit Out of This World, will soon be making its debut on the Sega CD. This is by far one of the most awaited sequels, since the ending of the original cart left the player with many unanswered questions, such as whether or not they had truly succeeded in making it out of the desolate world they acci-

dentally slipped into, or the whereabouts of the strange alien friend (without him, you wouldn't have lasted five minutes.) All these questions and many more will be answered in this new CD, which not only comes with Heart of the Alien, but also the original Out of This World, both on one disk, both with crystal clear CD sound effects and excellent graphics.

In Out of This World, you are thrust into an unknown world when an electrical storm interferes with your experiment at the lab. Getting out alive will not be easy—unless you find someone to help you.

# HEART OF THE ALIEN

## OUT OF THIS WORLD PART 2

The introduction in the beginning reveals the whole story of you and your friend. Many things take place before the first game begins that will answer a lot of your questions. Here are just a few of the incidents that will occur.

You start your adventure in room #1. Where's the scientist? Walk to the left, into room #2. When you see the beast, run as fast as you can back into room #3, and climb the rock to safety in room #4. Run back, and leap the first chasm in room #5, and use the second hole to drop down to the lower level.

Watch out for the many enemies, pitfalls, and traps in this new adventure—especially the beast in room #2, the first hole in room #5, and the dripping acid in room #6.

After sneaking your way through the dripping acid, make your way over to room #7 where you will pick up your whip. It is a very useful weapon if you can figure out when, and where to use it. Go up the elevator until you reach room #8; this is where you get your power-up for your weapon. Now you will be able to use the gun, but also the shield. Go through the door, and you'll end up in room #9, the prison area. Keep your shield up at all times when fighting the guards. At room #10, you need to be very quick in order to dodge the lasers. When you reach room #11, you need to whip the hanging fixture from the ceiling, and knock the guard into the hole. At room #12, take the elevator down but watch your step.

When you reach the area where Lester is in the air duct, it may be a lot easier to take on two guys with a little help from your friend. Use your head!

If you plan on making it through the intense levels, it's going to take a lot more brains than it is brawn. Try cooperating as much as you can with your friend.

**L**isten up all you role-playing nuts! Heimdall, the popular PC game, is on its way to the Sega CD. Our story unfolds as Loki, the god king of evil, fearing defeat in the upcoming battle against Odin, the creator of all the Viking people, sneaks into Valhalla late one evening and steals the gods' mightiest weapons—Odin's Sword, Frey's Spear, and Thor's Hammer. Now

being appointed by the mighty god Frey, your duty as the chosen warrior is to be cast down to Earth, and lead the Vikings in the search of the gods' almighty weapons, and then onward to defeat Loki in the final battle of Ragnarok. Accept the challenge of Heimdall and you will be taken to an ancient world filled with mystery, adventure, and sorcery.

At the start of the game, you have the option to test your skill at the sub games. You can try your luck at axe throwing, pig chasing, or fighting on a moving ship. Practice makes perfect.

At the Map Screen, decide which island you want to sail to.

Be sure to keep track of all your characters' items in the Sub-Screen.

Each of the 15 characters have different attributes—check out their strengths and weaknesses.

	Strength	Agility	Luck	Health	Magic
Alfrun is the strongest but has no magic abilities.	44	23	10	38	0
The wizard, Blafotr, is powerful with magic.	25	25	20	27	38
Cookta has the highest agility of all characters.	40	42	32	39	0

**D** When you reach the tabernacle at the end of the level, don't be alarmed by the man levitating in the air—he was put under a spell. If you can figure out how to reverse the spell, he will reward you with a very important item!

**C** Scrolls play a very important part in the game. Even if you can't read the scroll, hang onto it until later. You might be able to figure out what it says if you collect the right items and give them to the right people.

Besides all the scrolls, find items that may have more than one use.

When you get to the village, you will need to fight in order to obtain the scroll for the shop.

When you finally make it to the shop, buy and sell special items and even get a bite to eat.

The only way to cross a pitfall is with a spell. If you don't have one, return later.

If you're not careful when opening chests, you could be injured by a trap.

Every room holds many secrets. In this room the statues launch arrows.

At the Battle Screen, you can choose to fight with your weapons or use your magical powers on the enemy.

When entering the fifth island, you must be very careful where you walk. Many hidden traps will put an end to you and your party. Use your Traps Disarm spell in order to gain access to the treasure chests in the first room. Proceed with caution!

The power of descent will help you reach places you normally couldn't.

Some rooms have more than one door. Can you figure out where it is?

### THE GOOD

The 3-D style of play is a lot better than the normal top-view of most RPGs. Decent graphics!

### THE BAD

The access time on the Sega CD gets very annoying when flipping to the sub-screen. Too slow!

### THE UGLY

The enemies are ugly (especially the giant arachnid) but aren't very difficult to beat.

## THE GOOD

This game has great animations and control. The levels are different enough to keep you interested, too.

## THE BAD

The Bosses in this game are a little too easy. After a hard level you expect a challenge from the Boss.

## THE UGLY

The last Boss is ugly—every one of his heads, anyway!

**S**pinmaster is coming straight from the arcade to your home Neo-Geo machines. This is a one- or two-player side-scroller that is a blast to play. When you start the game, you are armed only with your faithful yo-yo.

As the game goes on, you acquire other weapons, all of which have three different levels. The regular attack is done by simply hitting the button. The strong attack is done by holding the button then releasing. The strongest attack is done by hitting the special button. There are a lot of different levels and enemies you will have to beat to save the girl and to find the treasure map!

# Spinmaster

## LEVEL 2

Fly to Egypt to keep on the trail.

The girl has been kidnapped and now it is up to you to save her. Armed only with your trusty yo-yo, your adventure begins!

Fight your way to the airplane through the airport, while all types of goons and bad guys try to stop you.

The Boss on this level takes off with the front of the plane, then flies it over your head, dropping bombs on you. After you beat him, he pulls out his back-up plan.

Now you have to deal with scorpions and quick sand. Open the chest for an icon.

Get ready for a fast-paced ride! This high-speed part of the level is on tracks.

## LEVEL 2-3

Level 2-3 is inside one of the ancient Egyptian pyramids. There are mummies that are not quite dead and flames that shoot up from the floors and out of the walls. The mummies come out of their caskets to stop you from reaching the top of the pyramid where you will find the Boss of this level. The Boss of this level is a group of four baskets each containing one giant snake!

## LEVEL 3

Level 3 starts on the castle walls.

Watch out for the guys that carry around bombs. Get them first.

Use the special move to wipe out everything on the screen.

Now you have to fight your way through a boat level. It gets a little crowded!

## LEVEL 5

This is the last level in the game. A sewer-type world waits for you where bats and green slime will try to take you out once and for all. Make it through this and it's on to the Boss!

This is the last Boss—well this is one of them you'll see in the level!

Open all of the chests to get different weapons.

The bursts of water can drown you, so jump over them.

This water serpent will drop a boulder on you. Use your super weapon to deflect it.

## WEAPONS

At the beginning of the game, all you have is the yo-yo, but you can pick up six different weapons. Each has three different power-up levels: normal, strong, and super bomb.

## BONUS GAMES

After every three matches, try your luck in the challenging bonus rounds.

In this bonus game, use the disk as a bowling ball to drop the pins.

This game is all fast-paced excitement. It plays very smooth and it is very responsive.

**THE BAD**

If you are playing by yourself the game is extremely short and you can beat everyone too fast.

**W**ind Jammers is a fast-paced game that is sort of a cross between frisbee, tennis, and soccer. The goal of the game is to score points by throwing a high speed, high impact frisbee into the opponent's goal. There are a variety of moves you can use in order to fake out the other player, including the loft, the normal throw, bank shots, the super power move, and the slide receive. There are several different playing fields, and nine different players. Every player has a different balance of speed and power. A couple of bonus games are included in the game which are available to you only after winning three in a row.

## TIME TO PLAY!

This game is all about fast-paced excitement, but first you have to pick your player and the playing field.

Choose from six different players. They all have different skills.

The stronger opponents can throw harder, but the faster ones can use tricky moves.

Try to move faster and smarter than your opponent. This is one quick game!

## SPECIAL MOVES!

This game involves a lot of strategy, because it contains many different moves like the loft, bouncing it off the walls, and using your special power move. Learning to fake out an opponent is vital.

There are three different scoring zones: Two are worth five points. The other is worth only three points, but has a much larger target. The only other way to score is if your opponent lets the disk touch the floor on his side of the board, which is worth two points.

# PRETTY COOL FOR A GUY NAMED DEXTER!

for instance. The evil Commander Borf has blasted you with his Infanto Ray and turned you into a little kid, captured your gal, Kimmy, and is threatening

Your mission?

Rescue the girl, save

the world, run the bad guy out

of the galaxy, and regain your manhood (not necessarily in that order)!

Now all the extraterrestrial action of the smash-hit arcade game comes to your Super NES® with 14

**P**ataank is the first first-person point-of-view pinball game ever made. Using amazing hard edge 3-D graphics, speed, video, neo-techno music, and stereo sound effects, Pataank delivers the exhilaration of an amusement park ride with the challenge of an action-packed pinball game. Up to four players can challenge each other through level after level and miles of hair-raising tunnels and chutes. Novice players can jump right in and take a wild ride as they learn the game, while advanced players will go for skill shots, earning specials, jackpots, and access to more challenging levels.

## THE GOOD

Pataank has great graphics and sound effects, but the main attraction is definitely the game play.

## THE BAD

Initially players may have difficulty getting accustomed to the controls, but only for a short while.

## THE UGLY

Play the game enough and you get the uncontrollable urge to watch the *Who's Tommy* video over and over!

To advance to other levels or to enter bonus rooms, you may have to break through a few barriers. Knock all three barriers over to open the gate. It may be tricky to knock them over, but keep trying.

Finally, after a few attempts, the passage to the bonus room is clear. Enter to rack up some extra points.

At the center of each level is a central core or target that you must take out. It will take several hits to destroy these targets. Since you are the pinball, it takes some skill to maneuver yourself into the proper position to hit the surfaces on the target.

The levels are filled with bumpers, ramps, shoots, drains, dingers, drop targets, and magnetos just like a real pinball game. The walls are filled with these targets so bounce off them to earn bigger bonuses and increase your score.

Guide your pataank through the tunnel to the next area after successfully completing the last level.

The first-person point-of-view is intense with fast and furious action, but it can get confusing after a while. Just shift to an overhead view and get a birdseye look at your surroundings to see where you are headed.

Available for Super NES, Sega Genesis, Gameboy and Sega Game Gear.

When there is a split in the road, follow the arrow or you will waste a lot of time.

Try to avoid hitting other cars. If you do, it slows you down and wastes valuable time.

## THE GOOD

This game controls as good as its arcade counterpart and is just as exciting!

## THE BAD

Because the screen is so small, the icons sometimes pass you before you know they are there.

Watch out for the other racers. They will nail you, and make you lose time.

There are a number of different modes to try. The Versus Mode is great!

Always look ahead for clues for turning your go-cart. You could end up in a wreck, thus losing the race.

## THE GOOD

The ability to link two players in a Game Gear game is a feature that should be used more often.

## THE BAD

The constant flashing of simulated scrolling is overly hypnotic. You keep going into trances!

## THE UGLY

Red-rum! Red-rum! Must kill Mario...Red-rum! Heh heh heh...!

## SONIC THE HEDGEHOG

Not content with his running speed, Sonic enjoys his new set of wheels.

## TAILS THE FOX

Tails is tired of living under Sonic's shadow. He's ready to shine.

## DR. ROBOTNIK

This hedgehog lass wants to win the race and Impress Sonic.

Robotnik enjoys a good race as much as everybody else does.

## AMY ROSE

**S**onic, all his friends, and of course, his old enemy, return for a wonderful racing cart for your Game Gear. Play as Sonic the Hedgehog, Tails the Fox, Amy Rose, and the vile, but ever so cuddly, Dr. Robotnik.

Choose from an array of tracks, and compete in the Chaos GP, or go for a Free Run, where you can practice your turns and drifts.

What's even more exciting is that you can link up with another player and race against him.

What would a cartoony driving game be without power-ups? You can collect rings and other nifty things to throw a wrench into the opponents' plans.

Sonic Drift is an action-packed cart full of fun!

## OPERATIONS MAP

Find the captured POWs by following the map from point to point.

## Sector 1 Level 1

Your mission is to land on the ground where you see the POWs standing.

Take the soldiers to your base and deposit them to safety. Collect them all and win.

A cool password feature!

Cool cinemas appear after the Combat Zones.

The Jungle Zone is loaded with hidden dangers.

Geysers and stalactites pose a threat to you.

Free a number of our soldiers being held hostage with your AH90 Comanche Attack Chopper. The situation is desperate, and the enemies have all sorts of artillery to take you down. Your only hope is to find the many missiles and bombs scattered around to nuke the bad guys.

Choplifter III is a relentless battle to free your comrades. Like the Super NES and Genesis versions, you will come up against the deadliest armies, and take them out in the most exotic locales. This Game Gear cart is loaded to the brim with action. This cart is a great sized-down copy of a classic game. If you like Choplifter, then you'll enjoy this one just as well!

# PAC-ATTACK

**P**ac-Attack is another game in the long line of Tetris-like puzzle games. It adds a semi-new twist because you use Pac-Man to eat the ghosts. Ghosts pollute your blocks and get in the way of destroying lines of bricks. You have to use Pac-Man to eat the ghosts and then complete the lines. Ghosts fall

with your blocks, making it even more difficult to complete whole lines. In the Puzzle Mode, there is a rearranged setup of ghosts and bricks. You must get rid of all the ghosts using a limited number of Pac-Men. To make it more difficult, ghosts also fall with your bricks and Pac-Men. There are 100 levels in the Puzzle Mode and they increase in difficulty each level you go up. You can also try your luck with two players in Throat-to-Throat Mode where you compete to see who can get the most lines and ghosts. This game is tough but extremely addicting.

## Normal Mode      Puzzle Mode

In Normal Mode, the objective is to keep the screen as clear of ghosts and bricks as possible. Use Pac-Man to eat the ghosts and line up the bricks in horizontal lines to clear them out. Try to keep the ghosts lined up horizontally and vertically to allow Pac-Man to reach all of the ghosts. The higher the level, the faster and sometimes even slower, the pieces fall.

This mode gives you a limited number of Pac-Men to use. You must eat all of the ghosts on the screen before you run out of Pac-Men. Doesn't that sound easy? I don't think so. The setup of the ghosts gets trickier and trickier the higher up you go. So go ahead and give it a whirl to see what you can do with it. This mode will definitely give you a run for your money.

This nifty little game keeps track of the top 10 scores through the game.

You have three options to choose from at this menu.

In Normal Mode you get to choose what speed you want to start out on. Try Hyper Mode!

As the number of ghosts increase, so does your chance of a row being cleared.

When all the ghosts are blue, Pac-Man is on his way to gobble up the ghosts and clean up.

Here is an ideal layout for the blocks since Pac-Man can eat more ghosts.

This layout, however, can make gobbling ghosts really difficult at higher levels of play.

The fairy pops up every so often in the Normal Mode. She can be used to give you a great advantage.

## The Fairy & The Effect

When you use her, she destroys all the ghosts within a certain area. She can help when your column is full.

### THE GOOD

It offers a brand new twist on the Tetris-type games. The Pac-Man element is cute.

### THE BAD

It offers a brand new twist on the Tetris-type games. It is too much like Tetris.

### THE UGLY

Knowing that Pac-Man is still popular after all this time.

### THE ANCIENT SHIP OF DOOM

Beware the quicksand! Sink too far and you may get killed.

Don't fall in the lava or you will lose a life.

Here the level scrolls upward. The lava is on your heels.

This is the second Boss. He uses a dive bomb as an attack and then flies to the top and shoots fire.

Climb the walls to get to the next section.

Experiment with different magics and use the one you like.

Pick up magics and magic power-ups for the Boss.

This is the Boss of Level One. He throws flame balls across the floor to inflict damage upon you. Stick and move quickly.

#### THE GOOD

The graphics are impressive and the game runs smoothly.

#### THE BAD

The B button jumps and the A button attacks. I think it should have been the other way around.

#### THE UGLY

Some of the enemies that come at you don't look so hot.

This is the very first part of Level One. There are two more sections and a Boss. Level One is fairly easy and is where you are going to learn how to control your character. There are different types of magic throughout the level and all can be used to your advantage. The magics consist of the windmill-throwing star, fire dragon balls, fire wheel, vacuum wave, and invincible fire wheel. Each has advantages so you need to experiment with all of them to find your personal favorite.

### SF2 in More Ways than One

#### Hasbro Rolling Out Extensive Toy Line

**I**f you still can't get enough of E. Honda's gut or Blanka's green skin and ape-like demeanor in Capcom's mega-popular Street Fighter II game, then Hasbro has just what

you're looking for.

They're in the process of rolling out a comprehensive line of Street Fighter toys including playsets, action figures (including 12" tall Hall of Fame figures with incredible detail (pictured below), die-cast figures, and more.

Hasbro has the license for the live-action Street Fighter movie due in '94.

## Strange but True

### Go For It Tonya!

• A woman's wrestling organization based in Japan offered figure skater Tonya "Night Stick" Harding \$2 million to wrestle. Although Harding originally scoffed at the offer, her recent plea bargain may cause her to reconsider.

### Wideman Hits the Widescreen

• Chris Farley, everybody's favorite fat guy from *Saturday Night Live* and ESPN commercials, has just inked a deal to appear in Paramount's tentatively titled *Billy the Third*, a comedy about an irresponsible, slovenly son of wealthy parents.

## Sure it's Cool, but...

**I**aded as we are, you might think we get exhausted covering shows like CES, ToyFair, and others to

bring our readers the very latest on what's hip and happenin'.

But we have to admit, ToyFair is pretty cool. It gives us a

preview of what will be the hot licenses this year, and it does manage to bring out the kid in us. But you'll never confuse us with these

two guys pictured here.

They are just a little bit too into their gigs. ToyFair is fun, but it can also be scary.

### Mighty Morphin Power Rangers Will Continue to Soar in 1994

**T**he hands down winner for most popular toy among younger boys in 1993 was, without a doubt, The Mighty Morphin Power Rangers.

"But all is not as it seems ... Rita Repulsa, the Empress of Evil, has been unable to defeat the Power Rangers in her quest for supreme power over Earth. In a behind-the-scenes power struggle, Lord Zedd, the new Lord of Evil, emerges to succeed the vanquished Rita and takes control of the Evil Space Aliens. With this dangerous turn of events, the Mighty Morphin Power Rangers are given new battle machines by the wise

sage, Zordon, and the eternal saga continues."

That's the story, now check out the toys from Bandai America.

Is this every kid's dream or what? But where's the MMPR blowtorch? Or the MMPR bulldozer?

# CULTURE SOURCE FOR EGM READERS

## Dem Bones are Frighteningly Cool

**F**or those of you who have a fascination with skeletons, Playmates Toys is rolling out a new toy line entitled Skeleton Warriors.

The action figures are some of the most detailed we have seen, and the vehicles

are equally as cool. Although there's no major license tie-in, these bones should be hot in 1994.

## The Ultimate Off-Road Machine

**T**his all-new 9.6 volt radio controlled vehicle from Kenner, known as Riccochet, is probably the sturdiest RC car we have ever seen. With fatty tires and a high-powered motor, this was one toy that we couldn't get enough of. Very cool indeed.

## GI Joe Celebrates 30 Years

**L**ong the flagship among Hasbro's toy lines, GI Joe Joe is just as popular now as ever.

To celebrate, Hasbro is honoring Joe's 30-year heroic history with commemorative editions of the original GI Joe recruits. These limited edition, fully poseable figures represent Joe in all his military glory.

In addition, Hasbro announced several new additions to its existing GI Joe lines, including new vehicles that really shoot foam projectiles, new combat gear, and other combat-ready paraphernalia.

## Show Your Allegiance to Mortal Kombat

**W**ith its elaborate displays and cool new products, Lego is always one of our favorite stops at ToyFair.

This year is no exception as the mechanic in the above photo and the bather in the lower pic can attest.

Lego announced a number of new products in 1994 including several additions to the Lego Town Set such as a Hot Rod Club, River Runners, Stunt Copter, and Pizza Parlor.

Lego is also coming out with some new lines such as the Paradisa collection that resembles the Art Deco world of South Miami Beach, and the Belville collection that is aimed at girls.

Their very popular space line is

also receiving several new additions such as the Lego System Spyrius Robo-Guardian and the Monorail Transport Base.

## It just ain't right...

Who is weirdo? And even more disturbing, what the heck is that statue he has in the background? We didn't stick around to find out, but fear-less **HERO**

Editor Frank Kurtz managed to snap this picture before the floggings began.

# Spawn Toys Coming Late '94

**T**odd McFarlane, the unofficial champion of creator-owned rights as well as one of Image Comics' leaders, is coming out with a line of toys based on his popular Spawn character. The line will feature fully articulated action figures, vehicles (including a killer replica of McFarlane's Spawmobile pictured below), and even a playset.

The toys pictured here are only prototypes, but look for the entire line near Christmas. It should be worth the wait.

Spawn—the first Image character to get his own line of toys. Are Wild-C.A.T.s and Youngblood far behind?

## Popular Batman: TAS Line Replenished

**T**he number one selling action figure line in 1993 should also make a strong showing in 1994 thanks to some excellent new additions.

Kenner will introduce no less than 38 brand new items in 1994—from cool new figures to a Batcave full of accessories and vehicles.

The 1994 releases are grouped into three distinct categories. First there's the *Batman: TAS* movie assortment, which ties in with the *Batman: Mask of the*

*Phantasm—The Animated Movie*. Next, there is the *Batman: TAS* collection. And finally, fans of the Caped Crusader will be able to choose the all new Series II additions to the live-action *Batman Returns* movie.

Among the coolest new additions are the Azreal figure pictured above and the Bisley-inspired Batmobile pictured at left.

## Marvel Figures Continue Their Strong Tradition

**W**ith the recent announcement of studio-style stores and a new *Spider-Man* animated series and big-budget live-action feature film on the horizon, Marvel is making a renewed push in the action figure market with a new line of Spider-Man and X-Men action figures.

Toy Biz is readying an excellent line of articulated Spider-Man figures that include such popular Spidey enemies as Carnage, the Lizard, Dr. Octopus, Venom, Kingpin, and more.

Meanwhile, the X-Men toy line is getting a boost with new releases including Rogue, Beast, Random, and (pictured above) Wolverine in metallic colors.

# StarGate: Year of the Pyramid

**A**lthough the film is still shrouded in secrecy, EGM went undercover to bring you the scoop on what may be one of the hottest films this summer.

*StarGate* is a big-budget, sci-fi thriller starring Kurt Russell and James Spader. The movie combines the mysteries and lore of ancient Egypt with the possibility of interstellar space travel.

Spader plays a brilliant young archaeologist who theorizes that the great pyramids were built with help from extraterrestrials. After his team discovers a magical stone ring, he manages to decipher the hieroglyphics and deter-

mines the ring is actually a teleporter to another world.

That's when Kurt Russell and his elite team of marines come in. They venture through the "Star Gate" where they

encounter a strange world that is both futuristic and ancient at the same time.

The movie combines elements of the *Indiana Jones* trilogy with elements from the *Star Wars* saga. Hasbro will be releasing the toy line which will include fully articulated action figures, vehicles (including the distinctive winged glider pictured at left), and other accessories.

# Aliens vs. Predator the Theme in '94

**W**ith their stunning detail and dramatic designs, the Aliens and Predator lines have been popular ever since they first came out to years ago. Kenner continues to keep both lines fresh with a careful selection of unique accessories.

Kenner's theme for 1994 is Beast vs. the Hunter, as a number of figs are coming out based on the Aliens vs. Predator theme.

The very cool piece pictured above comes with gross Alien slime, although *HERO* editor Frank Kurtz preferred using his own.

# JP still going strong

**T**he box office behemoth from 1993 is still attracting audiences across the globe, while the popular toy line from Kenner also enjoys continued success.

In 1994, the line keeps expanding with new vehicles, series II movie figures, and of course, new dinos.

# Hangin' Out with the Modern Stone Age Family

**E**ven before *Jurassic Park* popularized prehistoric times, there was a town called Bedrock where vehicles were run by foot-power and cameras, made of stone, had a tiny monkey inside, and when you aimed the lens and snapped a picture, the monkey would chisel the image onto a stone tablet.

This summer, we will get a fresh look at Fred Flintstone and his gang with the live-action *Flintstones* film starring John Goodman as Fred and Rick Moranis as Barney Rubble.

Mattel is coming out with a comprehensive toy line, and the figures look remarkably like their cinematic counterparts.

*HERO* editor and toy expert Frank Kurtz had a special affinity for the bowling set below. "YOU CAN NEVER HAVE ENOUGH TOY MONKEYS!" he screamed.

# BECAUSE LOSING SUCKS

## **SUPER ADVANTAGE.**

That "it's not whether you win or lose, it's how you play the game" stuff is a bunch of garbage.

That's why we've got two ways to keep you winning: the

The asciiPad.  
Devastation in the  
palm of your hand.

Super Advantage and asciiPad,™ both for the Super NES.® They've got the kind of enhancements you need for today's fiercest games—features like TURBO-FIRE (up to 32 shots

per second), hands-free AUTO TURBO and SLOW-MOTION CONTROL. With all these killer features and cool styling,

it's no wonder they're the #1 enhanced

controllers for the Super

NES. So take your pick, and then take on the neighborhood. With this kind of power, you'd just better learn how to be a gracious winner.

**IT'S HOW TO WIN.**
